

# **Expected ROI of off grid solar storage project in Germany 2026**

## Overview

---

Are rooftop PV systems paired with battery storage in Germany?

In 2019, 46% of all commissioned residential rooftop PV systems had already been paired with battery storage systems. Remarkably, this share surged to 77% in 2023, indicating a significant upward trajectory of the trend toward combining PV residential rooftop systems with battery storage in Germany.

What is the distribution between rooftop and ground-mounted solar?

The distribution between rooftop and ground-mounted is expected to be on par at 50% each, with continued growth across all markets, from residential to industrial and ground-mounted included. Earlier this week, BSW-Solar published data for the first four months of the year, which saw a record installed solar PV capacity of more than 5GW.

How much does wind and solar redispatch cost in 2023?

During sunny and windy phases, wind and solar park operators have to throttle or even shut down their systems repeatedly to avoid overloading the power grids. This resulted in redispatch costs of €3.1 billion in 2023.

## Expected ROI of off grid solar storage project in Germany 2026

---

### Large battery storage systems in Europe are all the rage

In Hungary, up to 45% of the project costs for large-scale battery storage are covered by grants, in addition to a CfD program and grid connection facilitations. See also: Central & Eastern Europe - Utility-scale storage market ...
