

# **Expected ROI of warehouse solar storage project in Italy 2025**

## Overview

---

Is Italy a leader in industrial energy storage and commercial energy storage?

Accordingly, there is a growing market for industrial energy storage and commercial energy storage projects, positioning Italy as a leader in advanced Italy storage solutions and renewable energy Italy initiatives.

How many energy storage systems are there in Italy?

Italy concluded the year 2023 with an impressive tally of 518,947 energy storage systems (ESS) integrated into the grid, marking a notable surge from the preceding year. According to data sourced from ITALIA SOLARE and Terna, these systems collectively wielded a power capacity of 3.37 GW and boasted a storage capacity amounting to 6.65 GWh.

How will the energy storage and hydrogen sector perform in Italy?

Mauro Moroni, co-coordinator of the Energy Storage and Hydrogen Working Group at ITALIA SOLARE, foresees a significant acceleration in the sector driven by decreasing module and battery costs, anticipating an increase in sales, especially in the commercial and industrial segments.

Why is energy storage important in Italy?

Such substantial growth underscores the burgeoning significance of energy storage within Italy's energy infrastructure. Ninety-six percent of the aggregate capacity came from storage linked to photovoltaic (PV) configurations, with the majority (94.2%) allocated to PV facilities generating less than 20 kW, totaling 515,567 units.

How can I get involved in the Italian solar market?

Get involved in the Italian solar market by attending the debut edition of Solar & Storage Italia – taking place 8-9 October. Italy's solar market has grown from 4,000 MW in 2005 to over 26 GW in 2023, driven by strong policies and cutting-edge technologies.

How will Italy's solar power impact grid stability?

This rapid expansion in Italy's solar is fueling the country's drive to have renewables contribute to 65% of electricity consumption by 2030. As the penetration of solar power increases, grid stability has become a critical issue.
