

Government procurement price of business energy storage in Argentina

Overview

The government's estimated investment for the projects is around \$500 million USD, with a required completion timeline of 12 to 18 months. The tender will pay a fixed \$10/MW of electricity supplied and energy storage capacity bids must have a maximum cost of \$15,000/MW/month.

The government's estimated investment for the projects is around \$500 million USD, with a required completion timeline of 12 to 18 months. The tender will pay a fixed \$10/MW of electricity supplied and energy storage capacity bids must have a maximum cost of \$15,000/MW/month.

The Argentine Energy Secretariat has received significantly more bids than expected for its public call to install large-scale battery energy storage systems (BESS) in the Buenos Aires metropolitan area (AMBA). Although the tender aimed for 500 MW, the AlmaGBA procurement drew proposals totaling

Argentina has awarded 667MW of battery energy storage system (BESS) in its first tender under the AlmaGBA scheme. Nearly half of the volume submitted for the tender (1.3GW) has been awarded by the wholesale market operator CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico Sociedad).

Argentina's government said on Monday it has awarded contracts for 667 MW of capacity in its first tender dedicated to battery energy storage systems (BESS), exceeding its original 500-MW target by about 30%. Energy storage battery. Photo by Anna Vasileva These projects will be installed in.

energy storage market in H1 2024. It is based on the prices from all the publicly announced winning bids from January 2023 to May 2024 by different districts, project of telecoms company Telstra. Another Fluence battery project discussed this week on Energy-Storage.news is the 10MW/20MWh EStor.

Contract prices settled between \$10,161 and \$12,815 per MW-month, comfortably below the reference price of \$15,000/MW-month set by CAMMESA, the market's administrator. This pricing dynamic signals both growing competition among developers and the increasing economic viability

of battery energy.

Although the Argentinian government has estimated that it will invest half a billion dollars of public funds, the project is being greatly supported by the private funds. The approved bidders will be getting a lesser-paid rate of 10/MW electricity supplied, and the bids in the energy storage.
