

Government procurement price of container energy storage in Spain

Overview

Pending approval, a total of EUR 167.6 million (\$187.1 million) has been allocated toward 46 standalone thermal and electrical energy storage projects, with a cost range from EUR 170/kWh to EUR 409/kWh.

Pending approval, a total of EUR 167.6 million (\$187.1 million) has been allocated toward 46 standalone thermal and electrical energy storage projects, with a cost range from EUR 170/kWh to EUR 409/kWh.

Pending approval, a total of EUR 167.6 million (\$187.1 million) has been allocated toward 46 standalone thermal and electrical energy storage projects, with a cost range from EUR 170/kWh to EUR 409/kWh. The Ministry for Ecological Transition and the Demographic Challenge (MITECO) has published the.

The government of Spain, through the Institution for the diversification and energy savings (IDAE) has awarded 880MW/1,809MWh in its first tender for energy storage to be co-located with renewables. Among the companies awarded from the Spanish strategic projects for the economic recovery and.

Spain has launched an ambitious €700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems. The goal is to improve how Spain uses renewable energy.

SpainTenders is the most authentic and comprehensive database of Spain Tenders, RFPs, Bids and eProcurement Notices. The information on eTenders, EOI, GPN and other public and private tenders from various industry sectors in Spain is sourced from newspapers, government public procurement portals.

Spain's €700M BESS Container Subsidy isn't just a pile of cash—it's a golden ticket for energy pros. This piece breaks down who qualifies (hint: standard BESS gets €250/kWh, grid-forming systems score €300/kWh), how to navigate the application maze (deadline July 15, 2025 —mark it!), and why.

Spain's ministry for the ecological transition said on Friday it will allocate EUR

700 million (USD 799.4m) in grants through competitive tendering to support large-scale energy storage projects in an effort to improve grid flexibility and integrate more renewables. Vanadium redox flow battery. How much money is available for energy storage projects?

A total of €700 million (US\$800 million) is available in the form of capex grants. It is open to standalone battery energy storage system (BESS) projects, thermal energy storage projects and pumped hydro energy storage (PHES) projects as well as those that are hybridised with renewable generation facilities.

What is the European Commission's new energy storage support scheme?

The European Commission approved a new support scheme. It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage.

Which energy storage projects are eligible?

It is open to standalone battery energy storage system (BESS) projects, thermal energy storage projects and pumped hydro energy storage (PHES) projects as well as those that are hybridised with renewable generation facilities. Eligible costs include civil works, storage systems, auxiliary equipment and systems and related expenses.

Government procurement price of container energy storage in Spain

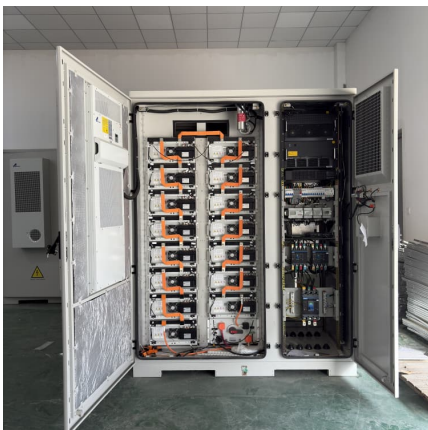

Public Procurement 2025

The procurement of government contracts in Spain is regulated by the following legislation: Law 9/2017 of 8 November, on public procurement law, which transposes into the national law the Directives of the European ...
