

# Government procurement price of home energy storage in Chile

## Overview

---

- The local government sees storage as a key part of Chile's decarbonization strategy, and the recent announcements aim to provide two separate (and predictable) main revenue streams: fixed payments for grid support and capacity reserve contracts.
- The local government sees storage as a key part of Chile's decarbonization strategy, and the recent announcements aim to provide two separate (and predictable) main revenue streams: fixed payments for grid support and capacity reserve contracts.

Between 2023 and 2030, 5.9 GW and 24.7 GWh of energy storage is forecast to be installed: • Chile's administration considers storage strategic for the country's goals (at least 60% of renewables by 2030, 100% by 2050). It proposed a law to allow the tender of 2 GW of BESS at a \$2 billion cost.

The government of Chile will launch a bill this year to procure large-scale energy storage systems for commissioning in 2026 totalling US\$2 billion of investment, on top of 5GWh already being sought for 2027-28. Speaking to the country's parliament last week, president Gabriel Boric said the new.

The Chilean authorities plan to hold the first procurement exercise for large-scale storage projects in 2024, with the first systems expected to go online in 2026. The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for.

The global market for battery storage grew twofold y/y to exceed 90 GWh in 2023, according to data of the International Energy Agency, and the volume of battery storage in use rose to over 190 GWh. Underpinned by hefty supportive policies, BESS has proven to be resilient to supply chain disruptions.

Chile aims for 70% renewable energy by 2030 —storage is the missing puzzle piece. The 2023 tender awarded contracts for 777 GWh of storage—enough to power 1.5 million homes for a day. Investments in Chilean storage projects could hit \$5 billion by 2025, says the Chilean Energy Commission. Remember.

With an investment of \$2 bn, the energy storage systems will commence operations in 2026 and will be the largest project in Latin America. The government of Chile has announced plans to introduce a bill this year aimed at procuring large-scale energy storage systems. With an investment of \$2. When will large-scale energy storage projects go online in Chile?

The Chilean authorities plan to hold the first procurement exercise for large-scale storage projects in 2024, with the first systems expected to go online in 2026. The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for large-scale energy storage facilities.

Is Chile preparing a tender mechanism for large-scale energy storage facilities?

The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for large-scale energy storage facilities. The measure aims to maximize the use of renewable energy generated in the northern part of the country.

How many GW of solar & wind are there in Chile?

Around 9 GW of solar and wind have been commissioned in the country between 2019 and 2023, an Enerdata report dated April 2024 shows. The share of renewables in Chile's power mix has been growing at a fast pace and reached 58% in 2023.
