

Government procurement price of industrial energy storage in Chile

Overview

In June 2023, the Chilean government announced its intention to introduce a bill to procure large-scale energy storage systems via a \$2 billion energy storage auction in 2024, with commissioning planned in 2026.

In June 2023, the Chilean government announced its intention to introduce a bill to procure large-scale energy storage systems via a \$2 billion energy storage auction in 2024, with commissioning planned in 2026.

The Chilean authorities plan to hold the first procurement exercise for large-scale storage projects in 2024, with the first systems expected to go online in 2026. The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for.

Between 2023 and 2030, 5.9 GW and 24.7 GWh of energy storage is forecast to be installed: • Chile's administration considers storage strategic for the country's goals (at least 60% of renewables by 2030, 100% by 2050). It proposed a law to allow the tender of 2 GW of BESS at a \$2 billion cost.

The government of Chile will launch a bill this year to procure large-scale energy storage systems for commissioning in 2026 totalling US\$2 billion of investment, on top of 5GWh already being sought for 2027-28. Speaking to the country's parliament last week, president Gabriel Boric said the new.

The global market for battery storage grew twofold y/y to exceed 90 GWh in 2023, according to data of the International Energy Agency, and the volume of battery storage in use rose to over 190 GWh. Underpinned by hefty supportive policies, BESS has proven to be resilient to supply chain disruptions.

In June 2023, the Chilean government announced its intention to introduce a bill to procure large-scale energy storage systems via a \$2 billion energy storage auction in 2024, with commissioning planned in 2026. This is in addition to the 5GWh of energy storage sought for commissioning in 2027-28.

A methodology has been introduced to evaluate and recognize the power capacity of stand-alone energy storage systems, and the availability of data

and studies has been improved to accurately identify peak hours that determine the calculation and subsequent payment of capacity, among other new. When will large-scale energy storage projects go online in Chile?

The Chilean authorities plan to hold the first procurement exercise for large-scale storage projects in 2024, with the first systems expected to go online in 2026. The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for large-scale energy storage facilities.

Is Chile preparing a tender mechanism for large-scale energy storage facilities?

The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for large-scale energy storage facilities. The measure aims to maximize the use of renewable energy generated in the northern part of the country.

How much battery storage capacity does Chile have?

According to data from Acera, the Chilean Renewable Energy Association, there are only 64MW of battery storage capacity currently active, representing 0.2% of national capacity. AES Andes, a subsidiary of U.S. company AES Corp. operates all 64MW at their Angamos and Los Andes substations.

How much energy does Chile need to replace coal?

In addition, Chile will need an estimated 9.5GW of new flexible capacity over the next decade to fully replace coal and to achieve a significant drop in emissions necessary to meet the government's climate goals.

How many GW of solar & wind are there in Chile?

Around 9 GW of solar and wind have been commissioned in the country between 2019 and 2023, an Enerdata report dated April 2024 shows. The share of renewables in Chile's power mix has been growing at a fast pace and reached 58% in 2023.

Government procurement price of industrial energy storage in Chile

[Innergex awards Mitsubishi Power 425MWh BESS ...](#)

Independent Power Producer (IPP) Innergex Renewable Energy has ordered two battery energy storage system (BESS) projects from Mitsubishi Power Americas for co-located sites in Chile, South America. Innergex has ...

[Chile Renewables Sector - Battery Storage Pipeline](#)

Chile has been able to take transform its energy matrix in a very short period of time. The growth of renewables has also uncovered weak points that need to be addressed if the sector will continue to grow. Battery storage is ...

Chile solar energy market 2025 -Opportunities, Policy, Trends ...

Chile's booming solar energy market in 2025, with policy support, industrial trends, and MOTOMA's turnkey solar + storage solutio for mining, agriculture, and residential ...

[Chile to become second-largest battery market in ...](#)

However, countries such Canada, Mexico, and Chile are actively promoting policies to stimulate energy storage development, positioning Chile to

become the second-largest energy storage market in
