

Government procurement price of solar storage inverter in Vietnam

Overview

The Vietnamese authorities released the feed-in tariff levels for ground-mounted and floating PV plants, with or without storage.

The Vietnamese authorities released the feed-in tariff levels for ground-mounted and floating PV plants, with or without storage.

For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region. For solar power plants relying on battery storage systems, the FiTs for the three regions will.

On April 10, 2025, the Ministry of Industry and Trade (MOIT) issued Decision 988/QĐ-BCT (“Decision”), updating Vietnam’s feed-in tariff (FiT) rates for solar power projects. These tariffs, effective under the framework of Circular 09/2025/TT-BCT issued on February 1, 2025 (“Circular”), will apply.

HÀ NỘI — The Ministry of Industry and Trade (MOIT) has officially issued the 2025 electricity generation price ceiling framework for various types of power plants, including hydropower, gas turbines using natural gas and solar power. The decisions came into effect on April 10, 2025, in line with.

Vietnamese authorities are looking to retroactively revise purchase prices for 173 solar and wind projects, reducing revenues by 25% to 46%, risking bankruptcies across the renewable energy sector, and jeopardizing investor confidence needed to meet the government’s 2030 targets of 73 gigawatts.

Vietnam’s Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems. The updated scheme highlights the growing importance of storage in stabilizing the.

Vietnam’s solar power sector is governed by a number of key regulations and policies aimed at promoting the development of renewable energy while managing the challenges associated with rapid growth. The FiT program has been a major driver of solar power development in Vietnam, offering a tariff

of. How much does a solar plant cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region.

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

How has the FIT program impacted solar power development in Vietnam?

The FiT program has been a major driver of solar power development in Vietnam, offering a tariff of 9.35 cents per kilowatt-hour (kWh) for projects completed by June 2019. This program led to a surge in solar capacity, reaching 4.46 gigawatts of new installations.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FITs were relatively low.

Are solar panels regulated in Vietnam?

Vietnam's solar panel trade is regulated under Decree 26/2023/ND-CP, which outlines the Schedule of Export Tariffs and Preferential Import Tariffs. This decree, effective from July 15, 2023, sets specific import duties on goods, including solar panels and related components.

Can solar and wind power meet Vietnam's near-term energy needs?

Such financial hurdles have challenged the government's ability to use fossil fuels to expand electricity supply in step with Vietnam's fast-growing economy. Contrastingly, solar and wind power's lower capital requirements

and faster development timelines are well-suited to meeting Vietnam's near-term energy needs.

Government procurement price of solar storage inverter in Vietnam

[Inverters RFP, bids and Government Contracts](#)
