

Guo yanheng energy storage

Guo yanheng energy storage

????????????????????????????????

Abstract: The organic phase change energy storage materials have high phase change latent heat, stable chemical properties, no supercooling and phase separation.

Green polymer hydrogels from a natural monomer with inherent

Engineering Research Center of Energy Storage Materials and Devices, Ministry of Education, School of Chemistry, Xi'an Jiaotong University, Xi'an 710049, China. Department of ...

[Ting YAN , Dr. , Shanghai Jiao Tong University, ...](#)

Thermochemical energy storage is an essential component of thermal energy storage, which solves the intermittent and long-term energy storage problems ...

Optimization and comparison of multiple solar energy systems for ...

The energy consumption characteristics of public sanitation service buildings in the Qinghai Tibet Plateau are significantly different from traditional

public buildings. It has unique advantages that ...

Superior high-temperature energy storage performance of PEI ...

Polymer-based dielectric capacitors are considered as important energy storage components in the electronic devices and power system owing to their hi...

Yanheng GUO (0000-0002-3131-3283)

Contributors: Peyman Karami; Vijay Kumar Rana; Qianyi Zhang; Antoine Boniface; Yanheng GUO; Christophe Moser; Dominique P. Pioletti Show more detail Source: Yanheng GUO grade ...

Promoted oxygen reduction kinetics on nitrogen-doped hierarchically

Electrocatalytic oxygen reduction reaction (ORR) is the vital process for next-generation electrochemical energy storage and conversion technologies, e.g., metal-air batteries and fuel ...

Large-area dendrite-free ultrathin Li-rich 3D Li-Sn alloy/graphene ...

Large-area, ultrathin and dendrite-free 3D Li-Sn alloy/graphene framework (GF) anode is demonstrated to show excellent lithium dendrite inhibition capability and minimum ...

Global-optimized energy storage performance in multilayer

A large energy density of $20.0 \text{ J}\cdot\text{cm}^{-3}$ along with a high efficiency of 86.5%, and remarkable high-temperature stability, are achieved in lead-free multilayer ceramic capacitors.

Presentations from the China-U.S. Renewable Energy Grid ...

U.S. experts shared the methodologies and results of U.S. RE integration and transmission studies, introduced management measures and technical solutions for resolving ...

Large-area dendrite-free ultrathin Li-rich 3D Li-Sn alloy/graphene ...

The stable lithiophilic sites of Li₂₂Sn₅ alloy can ensure stronger adsorption energy and lower diffusion energy barriers for Li on the 3D Li-Sn alloy/GF anode substrate, ...

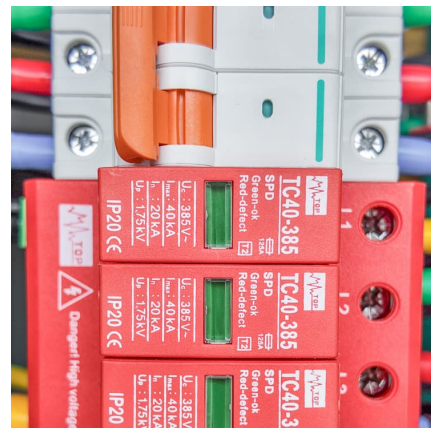

Energy and Exergy Analysis of Centralized Solar and Biogas ...

The increasingly serious haze weather, especially coal-fired heating in northern China, undoubtedly aggravates environmental pollution. At present, fossil energy consumption ...

A dynamic electrostatic shielding layer toward highly reversible Zn

The development of diverse electrochemical energy storage technologies has emerged as a pressing imperative to address the demands of modern industrial growth and ...

[Xi'an University of Architecture and Technology](#)

The scale of the thermal storage system is critical to balancing system fluctuations caused by the mismatch between solar heat collection and heating ...

Low-Strain and High-Energy KVPO

This work will invigorate the development of advanced PIBs toward high energy density for low-cost and large-scale energy storage applications. 2 Results and Discussion ...

Nano self-assembly of fluorophosphate cathode induced by surface energy

In the field of materials science and engineering, controlling over shape and crystal orientation remains a tremendous challenge. Herein, we realize a nano self-assembly ...
