

How to use outdoor emergency backup energy storage power supply

Overview

The basic steps for starting any engine is applicable to all portable generators, but there may be special steps involved or steps you don't need. This is where the owner's manual can help. Instructions on the generator may be hard to read in the dark. Write them on a card that you keep in a plastic zipper bag with.

Remember to choose a safe location that is at least 20 feet away from your home and where the exhaust won't blow against your house or the neighbor's house. Protect the generator from.

Always shut down your portable generator to refuel. Don't fill the tank when the engine is running. Remember to remove all your electrical loads before you shut down to refuel and check the oil.

Do remember to use the extension cords rated for outdoor use and sized to the generator receptacle . A 15-amp receptacle requires a 15-amp cord. A 20-amp receptacle requires a.
