

# Indian energy storage power station factory is running

## Overview

---

Lineage Power, a manufacturer specializing in power conversion systems (PCS) and controls, launched its state-of-the-art 5GWh BESS facility in Bengaluru on June 27, 2025.

Lineage Power, a manufacturer specializing in power conversion systems (PCS) and controls, launched its state-of-the-art 5GWh BESS facility in Bengaluru on June 27, 2025.

Energy storage is essential to capture solar and wind generation, Karnataka's energy minister said, at the opening of the 'first fully automated' battery storage factory in India. Lineage Power, a power conversion system (PCS) and power plant controls manufacturer with a background in the telecoms.

State-of-the-art energy storage solution reinforces commitment to India's renewable energy targets and bolsters grid stability initiatives Cummins India Limited ("Cummins"), one of the leading power solutions technology providers, today announced the launch of its Battery Energy Storage Systems.

Reliance Industries has committed INR 75,000 crore (almost 9 billion USD) to establish an integrated manufacturing ecosystem for solar value chain, battery energy storage systems (BESS) and electrolyzers at Jamnagar, Gujarat. Housed at the Dhirubhai Ambani Green Energy Giga Manufacturing Complex.

The fully automated BESS manufacturing plant is to be established by Bengaluru-based Lineage Power, a company specialising in power management solutions. In 2014, Lineage Power was acquired by PACE Digitek from General Electric Company. The Battery Energy Storage Systems facility boasts an annual.

Energy storage is critical for harnessing solar and wind energy, emphasized Karnataka's energy minister during the inauguration of India's first fully automated battery energy storage system (BESS) factory. Lineage Power, a manufacturer specializing in power conversion systems (PCS) and controls.

Battery energy storage systems (BESS) have solved a key challenge for renewable energy, addressing the fluctuating nature of sources like solar and wind. Globally, new solar and wind projects are now integrating modern energy storage systems to ensure a reliable energy supply. Countries like China.

## Indian energy storage power station factory is running
