

Industrial energy storage project financing options in Greece 2025

Overview

The Greek government has opened for applications a programme that will subsidise businesses to install energy storage systems, either as part of new solar projects or as an addition to existing plants. How many MW of storage will Greece need by 2030?

The majority of the projects (2,650 MW) belong to Group Γ and will connect to ADMIE as follows per region. A key factor driving companies is that this large capacity will cover all the storage needs Greece will require by 2030.

How much money will be allocated to small businesses in Greece?

A total of EUR 100 million in grants will be allocated for micro and small enterprises with the remaining share reserved for medium and large enterprises. All beneficiaries of the program should be existing businesses operating in the territory of Greece and established by June 30, 2024.

Is a 'fever' gripping the new energy storage sector?

An investment 'fever' is gripping the new energy storage sector as the ministerial decision was published yesterday (March 14, 2025), setting the rules for installations with a total capacity of 4.7 GW in our country. So far, three auctions have supported 900 MW projects with subsidies.
