

Industrial energy storage project financing options in Singapore 2026

Overview

What is energy storage systems for Singapore?

Energy Storage Systems for Singapore3.1 ESS has unique characteristics as it can act as both a load and a generator, allowing it to time-shift energy by charging and storing energy, and discharging the energy later when required. Depending on the technology and characteristics, ESS can provide short or sustained response. The mai.

Why is Singapore a good place to invest in renewables?

Finally, Singapore has built up a vibrant ecosystem of companies across the value chain ranging from clean energy solution providers, project and legal advisories and financiers that can support the development and execution of renewables projects in the region.

Can Singapore be a green financing hub?

We encourage companies to leverage Singapore's strengths as a green financing hub to tap on the wide range of world-class financial institutions here, such as UOB and Clifford Capital to support investments into renewables.

Why should we invest in Singapore?

First, Singapore is well-connected to project opportunities in SEA and the wider Asia Pacific region. We have also announced a target to import up to 4 GW of low carbon electricity by 2035 and have signed MOUs with neighbouring countries such as Vietnam and Indonesia to advance cooperations on importing renewable energy.

Industrial energy storage project financing options in Singapore 2020

Energy Efficiency Grant

The EEG will provide two tiers of support - a base tier to provide support for pre-approved EE equipment up to S\$30,000; and an advanced tier to support companies for larger investments ...
