CGN's PV & energy storage project in Yengisar is one of the first generation-side PV & energy storage pilot projects in Xinjiang jointly approved by Xinjiang Uygur Autonomous Region Development and Reform Commission and Xinjiang Supervision Office of the.

CGN's energy storage project is a significant initiative aimed at enhancing energy efficiency and grid reliability. 1. It primarily focuses on the integration of renewable energy sources, 2. improving energy access and reliability for consumers, 3. facilitating load balancing to manage supply and.

On December 13, 2024, the highest solar thermal energy storage ratio project in China, the China General Nuclear (CGN) Delingha 1 million kilowatt solar thermal energy storage integrated project, has achieved full capacity grid connection for its 800,000 kilowatt photovoltaic power generation.

In December 26, CGN 20MW PV power generation and 3MW/6MWh energy storage project in Yengisar, Xinjiang (CYG SUNRI was responsible for system integration for the project) was successfully connected to the grid, marking the official operation of the first PV & energy storage pilot project in.
