

Is yinghe technology an energy storage company

Overview

The company engages in research and production of new energy vehicles, energy storage, and 3C consumer electronics batteries, as well as the development of new solid-state batteries. It primarily serves the energy sector. The company was founded in 2021 and is based in.

The company engages in research and production of new energy vehicles, energy storage, and 3C consumer electronics batteries, as well as the development of new solid-state batteries. It primarily serves the energy sector. The company was founded in 2021 and is based in.

The company's products are widely used in various fields, including power, energy storage, and consumer batteries. Yinghe Technology is currently one of the few global companies capable of providing intelligent digital factory solutions for lithium battery manufacturing. The company has established.

Yinghe Technology conducts research, development, production, and sales of new energy automation equipment within the power battery industry. The company provides products that support the power battery production process, including automation solutions and customized products. Yinghe Technology.

Shenzhen Yinghe Technology Co., Ltd. was established in 2006. It is a national high-tech enterprise with 158 independent intellectual property rights. The company is also a key enterprise in the Torch Program and a well-known trademark in Guangdong Province. It is listed on the Growth Enterprise.

The company's products are widely used in various fields, including power, energy storage, and consumer batteries. Yinghe Technology is currently one of the few global companies capable of providing intelligent digital factory solutions for lithium battery manufacturing. The company has established.

Xu Xiaojun, co-founder of Yinghe Technology and founder and CEO of CESC, discusses the developmental challenges facing the energy storage sector and how to address consumer concerns over affordability. Green energy generation and energy storage solutions have seen a rapid growth in quality in recent.

Who is yinghe technology?

The company provides products that support the power battery production process, including automation solutions and customized products. Yinghe Technology serves the new energy sector and provides factory solutions to power battery manufacturers. It was founded in 2006 and is based in Shenzhen, Guangdong.

Where is yinghe technology headquarters?

Yinghe Technology's headquarters is located at 9th Floor, Block E, Building 5, Software Industry Base, Nanshan District, Shenzhen. What is Yinghe Technology's latest funding round?

Yinghe Technology's latest funding round is Corporate Minority - P2P - II. How much did Yinghe Technology raise?

Yinghe Technology raised a total of \$22.36M.

Who are yinghe technology's competitors?

Competitors of Yinghe Technology include Taogent Intelligent Equipment and 5 more. Anmate Technology specializes in the development, manufacturing, and sales of new energy materials in the new energy battery industry.

Are Chinese battery and energy storage technologies world-leading?

A. Chinese battery and energy storage technologies are definitely world-leading. Firstly, over the last 20 years, China has put a lot of effort into the electric vehicle (EV) and new energy industry, promoting the development of supply chains and sourcing of raw materials.

Are Chinese firms at the cutting edge of EV battery and energy storage?

Q. To what degree are Chinese firms at the cutting edge of EV battery and other energy storage technologies?

A. Chinese battery and energy storage technologies are definitely world-leading.

What are integrated energy storage solutions?

A. What we offer as a product are integrated energy storage solutions. The

easiest way to think about it is as a giant power bank that comes with a solar panel to charge it. For residential customers, it would be a smaller size than the larger ones used in industry. We are targeting both B2B and B2C segments.
