

# **Japan s new energy storage policy in 2023**

## Overview

---

According to Japan's 6th Strategic Energy Plan, battery storage will be increased as a distributed source of electricity closer to end users and within microgrids. This new policy calls for an increase in installed solar capacity from 79 gigawatts (GW) in 2022 to 108.

According to Japan's 6th Strategic Energy Plan, battery storage will be increased as a distributed source of electricity closer to end users and within microgrids. This new policy calls for an increase in installed solar capacity from 79 gigawatts (GW) in 2022 to 108.

The Strategic Energy Plan is a policy document formulated by the Government under the Basic Act on Energy Policy, which entered into force in June 2002. For further details, please refer to the link below. Website of METI Ministry of Economy, Trade and Industry. Nuclear Energy Policy.

Japan's energy storage sector is expanding, though growth remains uneven across segments. The overall market is expected to grow 11% annually, from USD 793.8 million in 2024 to USD 2.5 billion by 2035. Residential adoption is moving faster. Home lithium-ion battery systems generated USD 278.5.

Japan's 6th Strategic Energy Plan (released in 2021) and the GX (Green Transformation) Decarbonization Power Supply Bill (released in 2023) target increasing the share of non-fossil fuel generation sources to 59% of the generation mix by 2030 compared with 31% in 2022. Policies target an increase.

The Japanese Government emphasized the significance of securing "S Plus 3E" in the determination of these mixes. "S Plus 3E" stands for Safety, Economic Efficiency, Environment and Energy Security. "S plus 3E" are the basic principles of Japan's energy policy. Petroleum: Middle East is the main.

The ramp up of battery storage projects in Japan continues apace, aided by growing subsidy avenues and rising volumes on various electricity markets, from spot to balancing to capacity. As of May 2023, about 1.1 GW of supply has been contracted for grid-scale storage batteries nationwide, with. What is

## Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

## What is Japan's Energy White Paper 2024?

ANRE, 'Energy White Paper 2024'. The Japan Times, 'Japan Begins Review of Basic Energy Plan amid Spread of AI'. In December 2022, Japan unveiled its Basic Policy for the Realization of GX, a ten-year strategic roadmap to integrate energy and environmental policies.

## What is Japan's Energy Policy?

The enduring interplay of renewable energy, natural gas, and energy security remains a central theme in Japan's energy policy. Robust policy frameworks, inclusive policymaking, and strategic international cooperation remains essential for meeting Japan's ambitious energy and climate objectives.

## What is Japan's 6th Strategic Energy Plan?

According to Japan's 6th Strategic Energy Plan, battery storage will be increased as a distributed source of electricity closer to end users and within microgrids. This new policy calls for an increase in installed solar capacity from 79 gigawatts (GW) in 2022 to 108 GW by 2030.

## Does Japan's energy storage rollout face structural headwinds?

Despite strong policy signals, Japan's energy storage rollout faces deep structural headwinds. The nation's split-grid architecture—50 Hz in the east and 60 Hz in the west—limits electricity transfer and complicates nationwide deployment.

## What are Japan's Energy Policy and transition goals?

As Japan navigates this complex energy transition, the interplay of renewables, natural gas, and overarching energy security concerns will be critical in defining its future energy landscape, balancing economy and technological advancements with the goal to decarbonize. 2. Japan's energy policy and transition goals
