

# Japanese industrial energy storage battery after-sales service hotline

## Overview

---

Can EV batteries be reused in Japan?

One feature of our grid energy storage system is that it utilizes reused batteries from EVs. Although the penetration rate of EVs in Japan is still only about 1%, the Japanese government aims for 100% of all new passenger car sales to be EVs by 2035. This, at the same time, means that more batteries will be discarded.

Will Japan be forced to rely on foreign suppliers for batteries?

Competition for investment is intensifying in the public and private sectors worldwide, including in Europe and the US. all-solid-state batteries are put to practical use. Japan may be forced to rely on foreign suppliers for batteries. Future directions.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

Why are Japan's Top 10 battery manufacturers important?

The top 10 battery manufacturers in Japan made significant contributions to the rapid growth of lithium-ion, lead acid, and other advanced battery industries. These major companies ensure their products have the best performance and sustainability, making Japan one of the powerhouse in the battery sector.

How big is Japan's battery storage market?

In the commercial space, Japan's battery storage market was valued at USD 593.2 million in 2023 and is projected to reach USD 4.15 billion by 2030. While

commercial installations currently dominate revenues, industrial adoption is expected to scale faster. Utility-scale storage is also gaining ground.

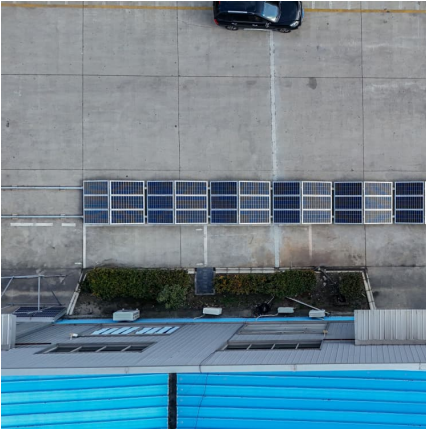

Who is the best battery manufacturer in Japan?

Mitsunami is one of the top 10 battery manufacturers in Japan which was established in 1959 and has 236.72 million yen in capital. They started their business in selling vacuum tubes, before producing electronic parts for devices such as capacitors, resistors, connectors, etc.
