

# **Kazakhstan energy storage power plant operation information**

## Overview

---

How many solar power plants are there in Kazakhstan?

As of now, there are 51 solar power plants in operation in Kazakhstan. The government aimed to have 28 solar power plants operational by the end of 2021 and successfully met this goal. The potential of solar energy in Kazakhstan is estimated at 2.5 billion kWh per year.

What is the total installed capacity of power plants in Kazakhstan?

As of January 1, 2022, the total installed capacity of power plants in Kazakhstan was 23,957, MW. Electricity in Kazakhstan is generated by 155 power plants of various forms of ownership.

What is the status of building new nuclear power plants in Kazakhstan?

Although plans have long existed to build additional nuclear power plants, little progress has been made on constructing these units, although the government is actively considering building a new nuclear power plant. Kazakhstan has some of the largest uranium deposits in the world and is the world's largest uranium producer.

Should Kazakhstan adopt an energy security strategy?

Global trend of tightening carbon regulation presents yet another impetus for broader modernization and systemic reforms of energy sector in Kazakhstan. Kazakhstan should articulate and adopt an official Energy Security Strategy document, guided by these general observations.

Why is diesel a major product in Kazakhstan?

Diesel is the single largest component (product) in Kazakhstan's refinery slate and in its domestic consumption balance; widely consumed within Kazakhstan, diesel is used across many economic sectors, while transportation (trucking) is the single largest consumer. Kazakhstan remained a (small) net importer of diesel each year during 2016-22.

Will Kazakhstan achieve its INDC conditional emissions target by 2030?

Given its current trajectory, Kazakhstan may not achieve its INDC conditional emissions target by 2030; national GHG emissions may even drift upwards in early 2020s with further economic recovery and higher energy consumption; a more concerted effort is needed to reverse this.

## Kazakhstan energy storage power plant operation information
