

# **Lithium mineral energy storage ranking**

## Overview

---

As of 2023, Bolivia is the country with the largest lithium reserves in the world with 23 million tons of lithium in total which is primarily located beneath the Salar de Uyuni salt flat.

As of 2023, Bolivia is the country with the largest lithium reserves in the world with 23 million tons of lithium in total which is primarily located beneath the Salar de Uyuni salt flat.

As of 2023, Bolivia is the country with the largest lithium reserves in the world with 23 million tons of lithium in total which is primarily located beneath the Salar de Uyuni salt flat. Despite this vast resource, Bolivia's lithium production remains minimal, contributing less than 1% to global.

Total worldwide lithium reserves stand at 30,000,000 metric tons as of 2024. Data is based on the most recent information from the US Geological Survey. Reserves data refers to contained lithium content. 1. Chile Lithium reserves: 9.3 million metric tons Chile holds the largest lithium reserves in.

Lithium has become a critical resource in the modern world, powering everything from electric vehicles (EVs) to renewable energy storage systems. As demand continues to rise, the world's largest lithium producers are competing to secure their place in the global lithium market. Below, we explore.

As for large-scale stationary energy storage systems, primarily for photovoltaic stations and wind farms, here, due to the lack of strict requirements for the weight of batteries, the trend will most likely finally shift towards lithium-free options, for example, batteries of the Sodium-Ion system.

Explore the top nine countries where lithium is mined, including Australia, Chile and China, the top three for lithium production by country. Juan Roballo / Shutterstock Interest in lithium continues to grow due to its role in the lithium-ion batteries that power electric vehicles (EVs). As a.

The world shipped 196.7 GWh of energy-storage cells in 2023, with utility-scale and C&I energy storage projects accounting for 168.5 GWh and 28.1 GWh, respectively, according to the Global Lithium-Ion Battery Supply Chain Database of InfoLink. The energy storage market underperformed expectations. Which country has the largest lithium reserves?

Chile has the largest lithium reserves, and the three countries that make up the Lithium Triangle — Argentina, Bolivia and Chile — together account for a large portion of the world's lithium reserves. What are the biggest lithium reserves in Europe?

Are lithium reserves a key to a sustainable economic future?

The global demand for renewable energy and electric vehicles has accelerated interest in the Top largest lithium reserves by country. Nations are realising that their natural resources will be key to a sustainable economic future. Investors and policymakers alike scrutinise these deposits to guide strategic development and global trade.

How much lithium is there in the world?

The annual Mineral commodity summaries 2025 published a week ago by the U.S. Geological Survey (USGS) provides new data on lithium reserves and production in the world as of 2024. According to the presented materials, global lithium resources reached 115 million tons, having increased by a little more than 9% over the year.

Is China bolstering its lithium ore reserves in 2025?

In early 2025, Chinese media reported that the country has significantly bolstered its lithium ore reserves, claiming national deposits now account for 16.5 percent of global resources, up from 6 percent.

What are Australia's lithium reserves?

Australia's lithium reserves stand at 7 million metric tons, the majority of which are found in Western Australia. Unlike those found in Chile and Argentina, Australia's lithium reserves are in the form of hard-rock spodumene deposits.

Where is lithium mined?

Explore the top nine countries where lithium is mined, including Australia, Chile and China, the top three for lithium production by country. Juan Roballo / Shutterstock Interest in lithium continues to grow due to its role in the lithium-ion batteries that power electric vehicles (EVs).

## Lithium mineral energy storage ranking

---

### World lithium production 2025

Lithium, often referred to as "white gold," is a vital mineral fueling the global energy transition, particularly in electric vehicle batteries and renewable energy storage. As ...

### [Top 4 Largest Lithium Reserves by Country](#)

Chile has the largest lithium reserves, and the three countries that make up the Lithium Triangle -- Argentina, Bolivia and Chile -- together account for a large portion of the ...

### [Lithium exploration boosts reserves, elevates ranking](#)

China's breakthrough in lithium exploration has boosted its global share of lithium reserves from 6 to 16.5 percent, raising its global ranking from sixth to second and enhancing ...

### [7 Biggest Lithium-mining Companies in 2025](#)

The main demand driver for lithium is what happens in the electric vehicle industry, which is expected to keep growing, and also the energy storage space.

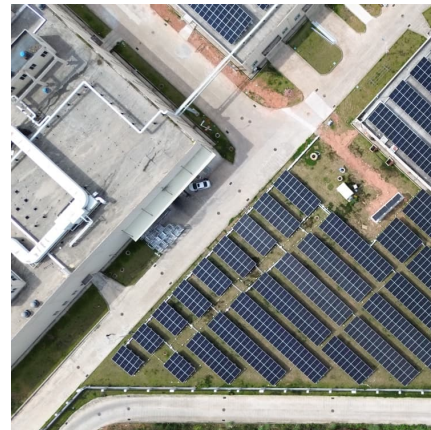

### Energy-storage cell shipment ranking: Top five dominates still

The energy storage market underperformed expectations in Q4, resulting in a weak peak season with only a 1.3% quarter-on-quarter growth. The top 5 companies shipping ...

### [China Regains Number One Spot in BloombergNEF's ...](#)

The fifth edition of BNEF's ranking finds that China's improved performance in infrastructure, paired with its resilience amid competitive ...

### [2024 Energy Storage Battery Cell Shipment Rankings](#)

Chinese energy storage battery companies performed exceptionally well, achieving record-breaking global shipments. CATL maintained its leading position for ...

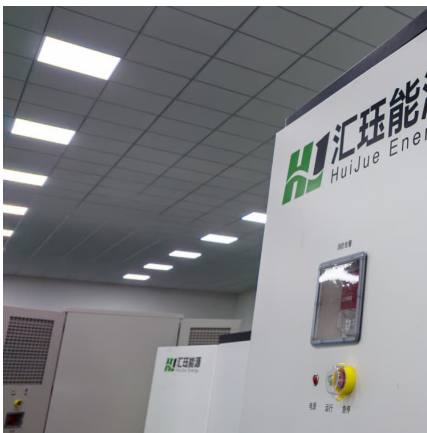

### [Top Lithium Reserves by Country: 2025 Global Leaders](#)

Discover the world's top lithium reserves by country, from Chile's salt flats to Australia's mines, driving the electric vehicle and renewable energy ...

### **The latest ranking of lithium energy storage equipment ...**

What is the capacity of lithium power (energy storage) batteries in China? The energy storage battery industry has reached nearly 1,900 GWh in China. However, the actual utilization rate of lithium ...

### **China's battery supply chain tops BNEF ranking for third ...**

China continues to dominate BloombergNEF's (BNEF) global lithium-ion battery supply chain ranking, for the third time in a row, for both 2022 and its projection for 2027, ...

### [Top 10 global energy storage battery cells by total ...](#)

This article will take you through the ranking of the top 10 global energy storage battery cells in terms of total shipments, provide you with a detailed explanation.

### The World's Top Lithium Producers in 2025

Lithium has become a critical resource in the modern world, powering everything from electric vehicles (EVs) to renewable energy storage systems. As demand ...

### China dominates global battery supply chain again, ...

China continues to lead rankings for involvement in the global battery supply chain, but the chasing pack of other countries is in flux.

### Lithium Resources, Reserves and Production 2024

As for large-scale stationary energy storage systems, primarily for photovoltaic stations and wind farms, here, due to the lack of strict requirements for the weight of batteries, the trend will most ...

### 1Q24 Energy-storage cell shipment ranking: CATL ...

The world shipped 38.82 GWh of energy-storage cells in the first quarter this year, with utility-scale and C& I projects accounting for 34.75 GWh ...

### [The top ten critical minerals powerhouses of the ...](#)

Lithium: Lithium is arguably the single most important critical mineral for the energy transition; a fundamental component of lithium-ion (Li ...

### [Lithium Resources, Reserves and Production 2024](#)

The annual Mineral commodity summaries 2025 published a week ago by the U.S. Geological Survey (USGS) provides new data on lithium reserves and production in the world as of 2024.

### [2024 Energy Storage Battery Cell Shipment Rankings](#)

In 2024, the global energy storage market continued its rapid growth, bolstered by policy support and increasing market demand. According to SMM statistics, global ...

### [Global Energy Storage Cell Shipment Ranking 1Q-3Q24](#)

According to InfoLink's global lithium-ion battery supply chain database, energy storage cell shipments reached 202.3 GWh in the first three ...

### [Top 9 Lithium-producing Countries , INN](#)

China's breakthrough in lithium exploration has boosted its global share of lithium reserves from 6 to 16.5 percent, raising its global ranking from sixth to second and enhancing ...

### [Fact Sheet: Lithium Supply in the Energy Transition](#)

An increased supply of lithium will be needed to meet future expected demand growth for lithium-ion batteries for transportation and energy storage.
