

# Master s destinations in electrochemical energy storage

## Overview

---

This two-year program brings together top institutions across Europe – including Warsaw University of Technology (Poland), Université Toulouse III – Paul Sabatier (France), Université de Picardie Jules Verne (France), University of the Basque Country (Spain), and University of Ljubljana (Slovenia) – to provide a highly international graduate education in the field of energy storage. What can I do with a Master's in battery technology & energy storage?

The Master's Programme in Battery Technology and Energy Storage prepares you for a career in both world-class academic research and the Swedish battery/electromobility industry, where qualified professionals are in high demand.

What is a Master's in energy storage?

Master's Programme in Energy Storage is jointly organized by the School of Engineering and the School of Chemical Engineering. The programme is coordinated by the School of Engineering. Energy storage touches every discipline present at every step of the renewable energy value chain; it is the key to energy sustainability worldwide.

Which universities offer a master's degree in energy conversion & storage?

The only master's degree with a specific programme in the area of energy conversion and storage. The consortium also includes two universities from the USA and Australia, three leading research centres (ALISTORE, CIC-EnergiGUNE and the NIC), and the French energy storage network.

Is energy storage part of EIT InnoEnergy Master School?

Energy Storage is part of EIT InnoEnergy Master school. It is a two-year Master's programme including compulsory mobility for the students. More information can be found on the program's website Read about the experience of our student Albert Rehnberg and follow his path!.

What is the coursework for a concentration in electrochemical energy?

The coursework for a concentration in Electrochemical Energy provides the MS candidate with an understanding of the fundamentals and technological challenges associated with batteries and fuel cells.

What is the energy conversion & storage master's track at TU/e?

The Energy Conversion and Storage (ECS) Master's track at TU/e equips you with the knowledge and skills to design, optimize, and innovate energy technologies for a carbon-neutral world. [Key Facts](#) [Explore Degree Structure](#) [What's in it for me?](#)

The ECS Master's track prepares you to tackle real-world challenges in the energy transition.

## Master s destinations in electrochemical energy storage
