ported an estimated 1.25 gigawatt-hours (GWh) of BESS in 2024. This could increase to 8.75GWh, or 26% of the projected peak demand in 2030, if business as usual persists. Such a shift could lead to stranded national grid by reducing demand and raising capacity payments. Timely investments in grid.

In Pakistan, the National Electric Power Regulatory Authority (NEPRA) has launched micro-grid initiatives to combat load-shedding and lower consumer costs. However, wider adoption —especially in rural electrification and industrial power supply —is essential. At Paksolar Renewable Energy, we are.
