

Microgrid storage tender price in Poland 2026

Overview

How many projects in Poland have received a grid connection offer?

As of October 2023, around 9GW of projects have received grid connection offers from Poland's Transmission System Operator PSE. Only 6 projects with a total capacity of around 1.5GW, have agreed on the proposed terms with the TSO, with an expected connection date post-2027.

How much will Poland pay for a 'standstill' in 2026?

Taking into account the volume of capacity obligations contracted as a result of previous deliveries (11.6 GW), Poland will pay PLN 5.8 billion or EUR 1.3 billion for the "standstill" of 18.8 GW of capacity in 2026 .

Does PGNiG support coal-fired power plants in Poland?

So far, the mechanism has provided financial support for existing or already built capacities, which in Poland are mainly coal-fired. The first auction (in which capacities we contracted for the past year) featured PGNiG's Żerań gas-fired CHP plant, which was already under construction at the time but was not commissioned until late 2021.

What happened in the power market in 2026?

In December, the power market auction for the supply year 2026 was held. It resulted in contracting 7.2 GW capacity and for the first time ever there was no coal capacity. This is the implication of EU regulations adopted in 2019 limiting the possibility to support power plants emitting more than 550 g CO₂/kWh.
