

Mobile ESS unit project financing options in Italy 2030

Overview

Recent policy changes include streamlined permitting processes and financial incentives for energy storage projects. The National Recovery and Resilience Plan (NRRP) allocates €1.5 billion for green technologies, including BESS. How much Bess capacity will Italy have by 2030?

That is why Italy aims to add 15GW of BESS capacity by 2030 (of which 11GW should be standalone and 4GW co-located). As of March 2025, Italy has got 1GW of grid-scale BESS capacity online, placing the country in third place in Europe (shared with Ireland) in terms of installed capacity, behind Germany (1.6GW) and the UK (5.6GW).

What is BW ESS & ACL energy doing in Italy?

BW ESS and ACL Energy expand their strategic partnership in Italy, developing 14 BESS storage projects with 2.9 GW of capacity.

Why is Telis energy advancing Bess Technology in Italy?

MP: Telis Energy is committed to advancing BESS technology in Italy. We are deploying state-of-the-art storage solutions and building strategic partnerships to address sector challenges. We focus on innovation and collaboration to accelerate the adoption of BESS and make a significant contribution to Italy's energy transition goals.

What is the future of energy storage in Italy?

MP: The future of energy storage in Italy is bright. With investments in technology, regulatory support, and declining costs, BESS will become a key pillar of Italy's transition to a sustainable energy future. Telis Energy is proud to play a role in this journey by originating, developing, and building high-quality BESS projects.

How important are Bess in Italy's energy transition?

MP: BESS are becoming increasingly vital in Italy's energy transition. With the

ambitious targets outlined in the National Energy and Climate Plan (NECP), including reducing carbon emissions and increasing renewable energy to 30% of final energy consumption by 2030, BESS are essential.

Is Bess a good investment in northern Italy?

While Northern Italy currently has the largest installed BESS capacity in the country, a build-out of RES in the South is increasing energy price volatility, creating a more compelling investment case for BESS in this region.
