

# Multi-link energy storage startup

## Overview

---

Some companies, like UK startup Field and Sweden's Ingrid Capacity, are developing large-scale batteries to store energy and hook into the grid. Others are working on software to make storage batteries more efficient, while some are designing new batteries. What are energy startups doing despite the global slowdown?

Reignite Growth Despite the Global Slowdown Energy startups are at the forefront of innovating the industry by introducing energy storage, carbon capture, smart metering, and more. These companies are improving efficiency, promoting sustainability, and driving the transition to cleaner energy sources.

What are the top 5 startup hubs for energy?

The top 5 Startup Hubs for energy are London, San Francisco, New York City, Bangalore, and Singapore. We hand-picked startups to showcase in this report by filtering for their technology, founding year, location, funding, and other metrics.

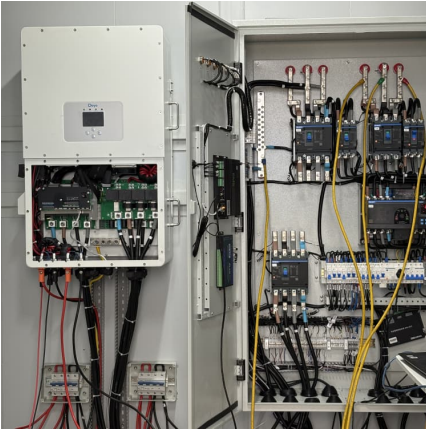

Is form energy a 'multi-day' energy storage option?

Form Energy, founded out of the labs at MIT and headed up by former Tesla Energy executive Mateo Jaramillo, claims the battery can be made cheaply using abundant materials, offering the grid viable 'multi-day' energy storage option. The US\$405 million Series F brings Form Energy's investment raised to date to well over a billion dollars.
