

# NMC battery storage tender price in Belgium 2030

## Overview

---

The report's authors predicted 200 GWh of stationary batteries are expected in the European Union by 2030, plus more than 2 TWh of capacity across 55 million EVs. The 270 million-strong EU car fleet must be zero-emission by 2030.

A study by McKinsey & Company highlights that EV sales are projected to rise from 4.5 million in 2021 to 28 million by 2030. This surge in demand could outpace the supply of these critical minerals, particularly cobalt and lithium. While advancements in mining technologies may boost lithium.

The European NMC Battery Pack market is projected to grow from XX million in 2025 to XX million by 2033, at a CAGR of 20.00% during the forecast period. The market growth is attributed to the increasing adoption of electric vehicles, government incentives, and the growing demand for.

The report explores trends and forecasts across residential, commercial & industrial (C&I), and utility-scale battery segments, offering deep insights into Europe's energy storage landscape. With record growth in 2024 and new projections through 2029, the study highlights key market drivers.

The BESS Price Forecasting Report provides an in-depth four-year forecast for LFP and NMC battery systems, shedding light on market dynamics, supply, and demand. With detailed "all-in" pricing breakdowns tailored for key markets like Western Europe and the U.S., the report offers invaluable.

LCP Delta provided a comprehensive competitive analysis of the Belgium battery storage market to help inform an investment decision on a project they are developing. Our client is one of the largest electricity producer and energy supplier in Europe, is seeking to develop a battery storage project.
