

Nsw government solar battery rebate

Overview

The NSW government is offering a rebate of up to \$1,500 for connecting a battery system to a Virtual Power Plant (VPP). From July 1 2025, the NSW VPP rebate is available to all households and business that connect a battery to a VPP.

The NSW government is offering a rebate of up to \$1,500 for connecting a battery system to a Virtual Power Plant (VPP). From July 1 2025, the NSW VPP rebate is available to all households and business that connect a battery to a VPP.

New battery incentives will be available from 1 November 2024 to help homes and businesses maximise the use of the solar energy they generate and cut the cost of electricity bills.

From 1 July 2025, the NSW Government introduced a new battery incentive for households and small businesses installing or connecting a solar battery: The Virtual Power Plant (VPP) Incentive. This replaces the previous NSW battery installation rebate, which officially ended on 30 June 2025. If.

With new battery solar battery rebate NSW launching on November 1, 2024, homeowners and businesses across New South Wales (NSW) will have a valuable opportunity to install battery storage and maximise their solar energy systems. These incentives are part of the Peak Demand Reduction Scheme (PDRS).

Save on solar battery costs and reduce your energy bills with the new NSW Solar Battery Rebate, launched on 1 November 2024. Under the Peak Demand Reduction Scheme (PDRS), the NSW Government is helping households and businesses with rooftop solar systems unlock the full potential of their solar.

The NSW government is offering a rebate of up to \$1,500 for connecting a battery system to a Virtual Power Plant (VPP). From July 1 2025, the NSW VPP rebate is available to all households and business that connect a battery to a VPP. The NSW government is no longer providing an upfront saving off.

UPDATE JUNE 10th 2025: The NSW Battery rebate ended June 30th, 2025. Now it only makes sense to use the federal battery rebate. A payment for joining a Virtual Power Plant (VPP) remains, but instead of two separate payments, it will be changed to one larger payment when a VPP is first joined. You. What is the NSW solar battery rebate?

Save on solar battery costs and reduce your energy bills with the new NSW Solar Battery Rebate, launched on 1 November 2024. Under the Peak Demand Reduction Scheme (PDRS), the NSW Government is helping households and businesses with rooftop solar systems unlock the full potential of their solar energy.

What is NSW's 2025 battery rebate?

NSW's 2025 Battery Rebate is now a VPP incentive offering up to \$1,500 for eligible solar battery systems. See eligibility, savings, and how to combine with the federal rebate.

Does NSW have a solar-plus-storage rebate?

This rebate applies nationwide, including in NSW, and aims to ease the upfront cost of going solar-plus-storage. Example: If a 10 kWh battery system costs \$10,000, the federal rebate could save you up to \$3,000. From 1 July, the NSW VPP battery incentive will increase.

How much does a solar system rebate cost?

Eligible homes and businesses can receive a rebate between \$1,600 and \$2,400 off the upfront installation cost of a new solar system battery, depending on the size of the battery. Additionally, an incentive of \$250 to \$400 is available for connecting the battery to a VPP.

Should I install a battery under the NSW battery rebate?

Installing a battery under the NSW Battery Rebate offers a wide range of benefits: A battery lets you store excess solar energy for use at night or during overcast periods, reducing grid reliance and maximizing your solar investment.

What is the federal solar battery rebate?

The Federal Solar Battery Rebate is a \$2.3 billion subsidy scheme by the Australian Government, officially known as the Cheaper Home Battery

Program. It is a nationwide solar battery incentive designed to accelerate battery adoption across Australia to reduce home battery installation costs by around 30%.
