

# **Office building energy storage tender price in South Africa 2030**

## Overview

---

What are South Africa's battery storage tenders?

South Africa's battery storage tenders mark a pivotal moment in the country's transition to a more sustainable energy future. The three tenders launched by the DMRE and Eskom are set to significantly increase the country's battery energy storage capacity, reduce carbon emissions, and stimulate economic growth.

Why should South Africa Invest in battery storage?

As South Africa grapples with the challenge of meeting its growing energy demands while transitioning to cleaner energy sources, Eskom's initiatives in battery storage are critical for ensuring grid stability and reducing reliance on coal-fired power plants.

How much battery storage capacity does South Africa have?

By the end of the third tender, South Africa is projected to have a total battery energy storage capacity of approximately 3,183 MWh. This capacity is sufficient to power an estimated 250,000 homes during peak demand periods. The graph below illustrates the growth in battery storage capacity over the three tenders.

How much solar power will South Africa produce by 2030?

Approximately 30GW of solar and 9GW of wind installed by 2030, producing 59TWh of wind and solar power (compared to an estimated 61TWh in IRP). This is more solar and less wind than the IRP allocation, but reaches similar generation volumes. Source: IRP 2019, South Africa NDC, BloombergNEF.

Will South Africa invest \$30 billion in New wind and solar?

South Africa's 2020-30 allocation of 14.4GW of new wind capacity and 4GW of new PV capacity under the 2019 Integrated Resource Plan (IRP) presents an investment opportunity for \$30 billion into new wind and solar assets by 2030.

This would represent a 50% increase in investment into wind and solar compared to the previous decade.

Are battery storage tenders a good idea?

The battery storage tenders are also expected to stimulate economic growth and job creation. The construction and maintenance of battery storage facilities will create thousands of jobs across the country, particularly in regions like the Free State.

## Office building energy storage tender price in South Africa 2030

### REGULATORY ASSESSMENT OF BATTERY

EXECUTIVE SUMMARY South Africa is facing a deepening energy crisis. Households and businesses are facing rapidly escalating electricity costs, declining reliability and unpredictable ...

### Battery Energy Storage System

Battery Energy Storage System (BESS) is one of Distribution's strategic programmes/technology. It is aimed at diversifying the generation energy mix, by pursuing a low-carbon future to reduce the impact on the environment. BESS ...

### Battery Energy Storage Project

South Africa is transitioning toward a low carbon economy. The government has adopted the Integrated Resource Plan 2019 (IRP) and intends to add more than 20,000 MW of wind and ...
