The Oregon Solar + Storage Rebate Program issues rebates for solar electric systems and paired solar and storage systems for residential customers and low-income service providers in Oregon. Rebates are issued to approved contractors, who pass the savings on to their customers. Funding for the.

The company's certified technicians are available to assist customers for 10 years after the installation of their solar or battery backup system, ensuring that any issues or questions that may arise are promptly addressed. In addition, the company is backed by Enphase, and Generac which is the.

Solar panels can power your home with clean, renewable energy while shrinking your energy bills and reducing your impact on the environment. Consider adding smart battery storage for even greater control, convenience and peace of mind. Solar + storage systems make your home energy resilient. The.

With home solar + battery storage, you will be able to reduce the electricity you pull from your utility and protect yourself from high utility rates. Excess solar production is stored in your battery, and your battery can power your home at night, on cloudy days, or during a power outage. If you.

Many Oregon residents are eligible for generous solar incentives and credits through state, local, and utility programs. This is on top of generous federal solar incentives. SEE WHICH INCENTIVES YOU QUALIFY FOR! Find Out! Solar incentives offer Oregon residents the opportunity to get discounts. Is there a solar rebate available in Oregon?

You can get a rebate worth up to \$2,500 for your battery with the Oregon Solar + Storage Rebate Program. Additionally, if you're income-eligible, you can earn up to \$10,000 in cash incentives with the Solar Within Reach program. All batteries above 3 kWh qualify for the 30% federal tax credit as well.

What is solar energy in Oregon?

Solar in Oregon Solar energy is radiant light and heat from the Sun. Solar technologies harness this energy for electricity generation, space and water heating, and other uses. Solar energy is a renewable resource as the energy comes from the sun.

What is the Oregon solar & storage rebate program?

Rebates are issued to approved contractors, who pass the savings on to their customers. Funding for the Oregon Solar + Storage Rebate Program is fully reserved as of May 2024, and ODOE is no longer accepting applications. ODOE will provide program updates on this webpage. You can also sign up to receive future updates by email.

How much do solar panels cost in Oregon?

The average cost of solar panels in Oregon is \$2.5 per watt, making a typical 6000 watt (6 kW) solar system \$10,517 after claiming the 30% federal solar tax credit. This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt.

Can I add battery storage to my solar system?

Yes, you can add battery storage to existing solar systems. Doing so can qualify for Energy Trust incentives and federal tax credits. However, to receive the Oregon Solar + Storage rebate, you must install the solar and battery storage at the same time. Why choose solar + storage instead of just a backup generator?

.

Why should you consider a solar & battery storage system?

Solar panels can power your home with clean, renewable energy and reduce your energy bills. Adding smart battery storage provides greater control, convenience, and peace of mind, making your home energy resilient.
