## Overview

What is an energy storage system (ESS)?

Covers an energy storage system (ESS) that is intended to receive and store energy in some form so that the ESS can provide electrical energy to loads or to the local/area electric power system (EPS) when needed. Electrochemical, chemical, mechanical, and thermal ESS are covered by this Standard.

What safety standards affect the design and installation of ESS?

As shown in Fig. 3, many safety C&S affect the design and installation of ESS. One of the key product standards that covers the full system is the UL9540 Standard for Safety: Energy Storage Systems and Equipment . Here, we discuss this standard in detail; some of the remaining challenges are discussed in the next section.

Does industry need standards for energy storage?

As cited in the DOE OE ES Program Plan, “Industry requires specifications of standards for characterizing the performance of energy storage under grid conditions and for modeling behavior. Discussions with industry professionals indicate a significant need for standards . ” [1, p. 30].

How can utilities specify ESS characteristics?

As stated earlier, EPRI ESIC has developed detailed energy storage specifications which utilities can use to specify ESS characteristics. The utilities, in their request for proposals, can specify which standards apply to meet the technical specifications.

What is energy storage R&D?

[1, p. 30]. Under this strategic driver, a portion of DOE-funded energy storage research and development (R&D) is directed to actively work with industry to fill energy storage Codes & Standards (C&S) gaps. A key aspect of developing energy storage C&S is access to leading battery scientists and their R&D in-

sights.

How can energy storage C&S help the development of ESS projects?

The resulting report, published in 2019, is a best 311] on how energy storage C&S can help facilitate the use of risk and financial tools needed for the development of larg-er ESS projects. Another financial example comes from the experiences of solar photovoltaic (PV) installation.
