

# **Outdoor liquid cooling energy storage cabinet**

## Overview

---

The liquid cooling battery cabinet is a distributed energy storage system for industrial and commercial applications. It can store electricity converted from solar, wind and other renewable energy sources. With liquid cooling technology, it is cost-effective and easy to maintain and.

The liquid cooling battery cabinet is a distributed energy storage system for industrial and commercial applications. It can store electricity converted from solar, wind and other renewable energy sources. With liquid cooling technology, it is cost-effective and easy to maintain and.

The commercial and industrial energy storage solution we offer utilizes cutting-edge integrated energy storage technology. Our system is designed to enhance energy density and thermal performance, accelerate installation times, engineered for optimal serviceability, and minimizing capital.

Project features 5 units of HyperStrong's liquid-cooling outdoor cabinets in a 500kW/1164.8kWh energy storage power station. The "all-in-one" design integrates batteries, BMS, liquid cooling system, heat management system, fire protection system, and modular PCS into a safe, efficient, and flexible.

At GSL Energy, we proudly announce that our state-of-the-art liquid-cooling outdoor lithium-ion battery cabinets have received UL9540, UL1973, and IEC62619 certifications. These internationally recognized certifications underline our commitment to providing reliable, safe, high-performance energy.

SUNWODA's Outdoor Liquid Cooling Cabinet is built using innovative liquid cooling technology and is fully-integrated modular and compact energy storage system designed for ease of deployment and configuration to meet your specific operational requirement and application including flexible peak.

Adopting the design concept of "ALL in one", the long-life battery, battery management system BMS, high-performance converter system PCS, active fire protection system, intelligent power distribution system, thermal management system, energy management system EMS is integrated into a

single.

Highly Integrated System: Combines power modules, batteries, refrigeration, fire protection, dynamic environment monitoring, and energy management in one unit. Real-Time Intelligent Management: Features real-time liquid leakage monitoring and intelligent battery management to ensure consistent.
