

# Report on energy storage news

## Overview

---

The U.S. energy storage market added more than 2 GW across all segments in Q1 2025, marking the highest Q1 on record. The utility-scale segment led the way with more than 1.5 GW of new capacity, representing a significant 57% increase compared to Q1 2024.

The U.S. energy storage market added more than 2 GW across all segments in Q1 2025, marking the highest Q1 on record. The utility-scale segment led the way with more than 1.5 GW of new capacity, representing a significant 57% increase compared to Q1 2024.

Two energy storage topics appeared to come up in conversation more than any other at the first day of RE+: US domestic content and the race for energy density increases. It's still too early to see the financial impact on energy storage suppliers in the wake of Trump's tariffs and legislation.

HOUSTON/WASHINGTON, D.C. June 25, 2025 — According to the new U.S. Energy Storage Monitor developed by Wood Mackenzie and the American Clean Power Association (ACP), the American energy storage market experienced record growth in Q1 2025—amidst current policy uncertainty. The U.S. energy storage.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions support renewable energy integration and grid transition to clean power.

Latin America's energy storage market set to hit 23 GW by 2034 A new report forecasts that Chile will lead the region in energy storage capacity, followed by Mexico and the Dominican Republic - driven by supportive regulatory frameworks and the growing adoption of hybrid energy projects. Italy's.

Our commitment to delivering world-class integrated energy storage solutions to our customers is built upon employing cutting-edge renewable energy conversion and best-in-class battery technology. Sungrow's energy storage systems lead the future of renewable energy, offering exceptional efficiency.

China, which already boasts the world's largest energy-storage capacity, is set to nearly double that level by 2027, with an anticipated investment of 250 billion yuan (US\$35 billion), according to Beijing's latest action plan. As outlined in the action plan, China's "new-energy storage system".

## Report on energy storage news
