

Requirements for submission of energy storage science and technology

Overview

Those which do not conform to the submission requirement will be returned to the author for revision before submitting for refereeing. The final decision on the acceptance or rejection of the manuscript is made by the Energy Storage Science and Technology Editorial Board.

Those which do not conform to the submission requirement will be returned to the author for revision before submitting for refereeing. The final decision on the acceptance or rejection of the manuscript is made by the Energy Storage Science and Technology Editorial Board.

Energy Storage Science and Technology (ESST) was founded in 2012, and hosted by Chemical Industry Press and the Chemical Industry and Engineering Society of China (2016). The editor-in-chief now is professor HUANG Xuejie of Institute of Physics, CAS. ESST is focusing on both fundamental and applied.

ESST is a peer-reviewed journal in the field of energy storage. It is an Open Access (OA) journal, meaning that all articles are freely available to read and download. The journal covers a wide range of topics related to energy storage, including fundamental research, materials, and applications.

ESST is currently ranked in the "Top 500 Wh/kg" category. The journal is expected to be published in 2024.

Energy Storage Science and Technology (ESST) (CN10-1076/TK, ISSN2095-4239) is the bimonthly journal in the area of energy storage, and hosted by Chemical Industry Press and the Chemical Industry and Engineering Society of China in 2012. The editor-in-chief now is professor HUANG Xuejie of.

The manuscript must be written in English; 2. The manuscript shall be typeset according to the template standard, with at least 4 pages; 3. The theme of the paper shall be related to the theme of the meeting; 4. Plagiarism and plagiarism are prohibited, and multiple submissions are prohibited; 5.

ESST considers the following types of articles for publication: * Full Length

Article: Full length articles (4000-7000 words) are original, high-quality, research papers presenting novel scientific findings related to energy storage;
* Review: Reviews (6000-8000 words) are state-of-the-art overview. What is energy storage Science & Technology (ESST)?

ESST is focusing on both fundamental and applied aspects of energy storage science and technology. Submissions can be in English or Chinese. It is included in Chinese Sci-tech Core Journal, main indexed by CSCD (China), Ulrichsweb (America), INSPEC (England), CA (America), and others database etc. More.

Does energy storage offer free format submission?

Energy Storage now offers Free Format submission for a simplified and streamlined submission process. Before you submit, you will need: Your manuscript: this should be an editable file including text, figures, and tables, or separate files—whichever you prefer.

Who can I contact if I need More information about energy storage?

Editorial Office Contact Details If you need any further information or help with your submission, please contact: ESTedoffice@wiley.com Energy Storage is a new journal for innovative energy storage research, covering ranging storage methods and their integration with conventional & renewable systems.

Can I post a pre-publication version of a manuscript to energy storage?

Energy Storage will consider for review articles previously available as preprints. You may also post the submitted version of a manuscript to a preprint server at any time. You are requested to update any pre-publication versions with a link to the final published article. Data Sharing and Data Availability Energy Storage expects data sharing.

Does energy storage accept artwork submissions for cover images?

Cover Image Submissions Energy Storage accepts artwork submissions for Cover Images. This is an optional service you can use to help increase article exposure and showcase your research. For more information, including artwork guidelines, pricing, and submission details, please visit the Journal Cover Image page.

What is the Journal of energy storage?

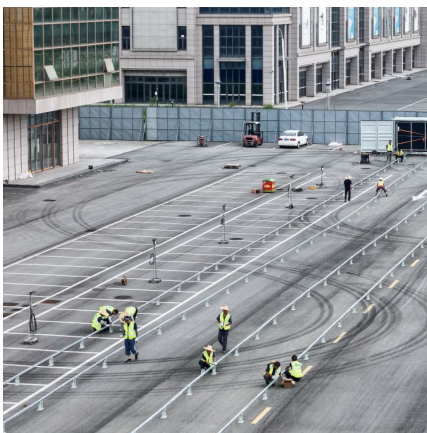

The Journal of Energy Storage focusses on all aspects of energy storage, in particular systems integration, electric grid integration, modelling and analysis, novel energy storage technologies, sizing and management strategies, business models for operation of storage systems and energy storage developments worldwide.

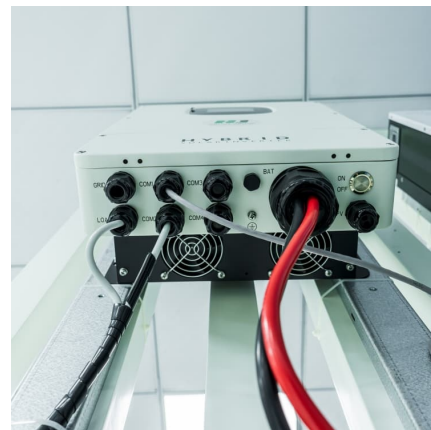

Comprehensive review of energy storage systems technologies, ...

The applications of energy storage systems have been reviewed in the last section of this paper including general applications, energy utility applications, renewable ...

Energy Storage Science and Technology

Hydrogen energy is expected to become the "ideal fuel" in the era of decarbonization; therefore, the discovery, development, and modification of high-performance ...

Energy Storage Science and Technology

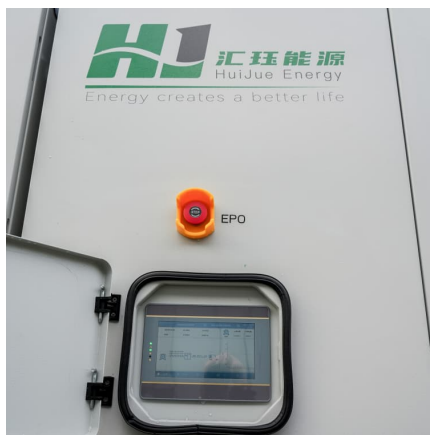

Thermochemical heat storage has the advantages of high energy storage density, good cycling performance, long storage time and small heat loss, and has a broad prospect in ...
