The Wattsmart battery program is a four-year program in which participants give Rocky Mountain Power permission to use the energy stored in solar batteries installed at their home or business in exchange for upfront and ongoing incentive payments. The upfront Wattsmart incentive is equal to \$400.

Rocky Mountain Power's Wattsmart Battery Program launched December 1, 2020, and is available to homes and businesses that either have or want to install an in-home or on-site battery storage system. Currently the program is only available for customers with a rooftop solar system, or a rooftop.

Rocky Mountain Power's Wattsmart program offer financial incentives to homeowners and businesses who install battery storage systems in their

territory. Homeowners can receive \$400/kW with a cap of \$2,000 per household. Businesses can receive up to \$500/kW. The incentive is based on the continuous.

We are on the path to reduce greenhouse gas emissions 74% by 2030 and 98% by 2050. As we work toward a cleaner energy future, we have been able to keep our prices among the lowest in the nation. Compared to the national average, Rocky Mountain Power's prices are 45% lower. 2,700 batteries enrolled. What is Rocky Mountain Power's wattsmart battery program?

Rocky Mountain Power's Wattsmart Battery Program launched December 1, 2020, and is available to homes and businesses that either have or want to install an in-home or on-site battery storage system. Currently the program is only available for customers with a rooftop solar system, or a rooftop solar system paired with a battery.

Does Rocky Mountain Power offer battery storage?

Rocky Mountain Power is paying customers to share battery storage and help maintain a more stable grid with fewer outages. By participating, customers earn an upfront incentive and ongoing bill credits, while using renewable energy to help keep electricity prices in Utah, Idaho, and Wyoming among the nation's lowest. Am I eligible?

.

Who qualifies for Rocky Mountain Power?

Qualifying Rocky Mountain Power customers must be on Electric Service Schedule 135, 136, or 137 to be eligible. All equipment is installed, connected, and meets all program requirements for participation on or after December 1, 2020. Battery must be charged by customer onsite solar system. Incentive capped at 70% of battery equipment costs.

Who is a good fit for Rocky Mountain Power?

Rocky Mountain Power says the best people fit for the program are "customers who are early adopters of technology, energy conscious and want to make a positive impact on the environment with renewable energy". If these are things you're passionate about, this is a great way to be a part of a new program.

How do I become a member of Rocky Mountain Power?

Easy online application and approval process. Qualifying Rocky Mountain Power customers must be on Electric Service Schedule 135, 136, or 137 to be eligible. All equipment is installed, connected, and meets all program requirements for participation on or after December 1, 2020. Battery must be charged by customer onsite solar system.

Are SolarEdge batteries eligible for wattsmart?

Sonnen and SolarEdge brand batteries are currently the only batteries eligible for the program. The program terms and conditions are vague and subject to change at any time, so participants must be comfortable with the possibility of earning less money than they initially thought.
