

San diego invests in energy storage industry

Overview

SDG&E's utility-owned battery storage portfolio is expected to reach nearly 480 MW of power capacity and over 1.9 GWh of energy storage by year-end, including the Westside Canal expansion and two additional projects in San Diego County currently being constructed.

SDG&E's utility-owned battery storage portfolio is expected to reach nearly 480 MW of power capacity and over 1.9 GWh of energy storage by year-end, including the Westside Canal expansion and two additional projects in San Diego County currently being constructed.

SACRAMENTO — The California Energy Commission (CEC) today approved a \$42 million grant to build a long-duration energy storage project at Marine Corps Base Camp Pendleton in San Diego County. The project will provide electricity to the statewide grid and backup power to the base for up to 14 days.

Advancing energy storage technologies to unlock the full potential of solar, wind, and other sustainable energy sources. To accelerate the development and deployment of energy storage systems through rigorous research, real-world testing, and collaboration with industry partners. Renewable energy.

SAN DIEGO, March 14, 2025 /PRNewswire/ -- San Diego Gas & Electric (SDG&E) announced today the California Public Utilities Commission (CPUC) has approved an expansion of the company's Westside Canal Battery Energy Storage facility in California's Imperial Valley. This expansion project will add 100.

San Diego Gas & Electric (SDG&E) is expanding its Westside Canal Battery Energy Storage facility in California's Imperial Valley, a move expected to significantly enhance grid resiliency and support the state's clean energy transition. The California Public Utilities Commission (CPUC) has approved.

SDG&E has been rapidly expanding its battery energy storage and microgrid portfolio. We have around 21 BESS and microgrid sites with 442 megawatts (MW) of utility-owned energy storage and another 40+ MW in development.

Typically, these battery systems and microgrids are installed on SDG&E-owned.

The clean technology industry is skilled at generating renewable energy from the elements, but where does that energy go when the sun stops shining and the wind stops blowing?

As San Diego and the world continue to invent new ways to maximize energy output from clean resources, a new challenge. Does SDG&E have a battery & microgrid portfolio?

SDG&E has been rapidly expanding its battery energy storage and microgrid portfolio. We have around 21 BESS and microgrid sites with 442 megawatts (MW) of utility-owned energy storage and another 40+ MW in development.

How much battery storage does SDG&E have?

SDG&E's utility-owned battery storage portfolio is expected to reach nearly 480 MW of power capacity and over 1.9 GWh of energy storage by year-end, including the Westside Canal expansion and two additional projects in San Diego County currently being constructed.

What are energy storage projects?

Energy storage projects support grid reliability and the integration of more clean energy into the electric grid. Enables the California Independent System Operator (CAISO) to dispatch energy from our batteries at any time to help balance supply and demand on the statewide grid.

How big is San Diego's battery storage capacity?

Within the past five years, the state has grown its battery storage capacity by more than 15 times, up from just 770 MW in 2019. The project will help support the Marine Corps' largest West Coast expeditionary training facility, which encompasses more than 125,000 acres in San Diego County.

Is SDG&E a good company?

SDG&E is a recognized leader in its industry and community, as demonstrated by being named Corporate Partner of the Year at the San Diego Business Journal's Nonprofit & Corporate Citizenship Awards and receiving PA Consulting's ReliabilityOne® Award for Outstanding Reliability Performance for 18 consecutive years.
