

Sodium ion battery storage supplier quotation in Luxembourg 2030

Overview

What is the sodium-ion battery market?

The sodium-ion battery market is currently characterized by low market concentration, with a mix of established players from the lithium-ion battery industry and emerging startups developing sodium-ion technology.

Will the sodium ion battery market remain dominant in 2030?

Frequency response markets pay for millisecond ramp capability, where sodium-ion cells sustain high power pulses without thermal runaway. Analysts see the sodium ion battery market share for utilities remaining dominant through 2030, supported by national storage mandates in China and multi-gigawatt auction programs emerging in India.

What is the market size of sodium-ion battery in 2024?

By end-user industry, utilities held 55% share of the sodium-ion battery market size in 2024, while automotive is advancing at a 20% CAGR through 2030. By region, Asia-Pacific accounted for 47% of the sodium-ion battery market size in 2024 and is progressing at a 20% CAGR to 2030.

Which companies are launching sodium-ion batteries in 2024?

For instance, in March 2024, BMZ Group, one of the leading German companies, launched sodium-ion battery product with the brand name of NaTE SERIES. These newly launched products are used for applications where energy density is not paramount.

How much is the sodium ion battery market worth in 2025?

The market stands at USD 465.21 million in 2025 and is forecast to reach USD 1,003.92 million by 2030, advancing at a 16.63% CAGR. Which application segment leads sodium-ion battery demand?

.

Are sodium ion batteries the future of energy storage?

Energy storage emerged as the largest end-use segment with a market share of about 50.51% in 2023 and is expected to witness robust growth over forecast period. From grid-level applications to residential energy storage systems, sodium-ion batteries offer a compelling solution for storing renewable energy efficiently and cost-effectively.
