

Solar Inverter cost breakdown in Greece 2026

Overview

What is solar energy in Greece?

Solar energy is one of the cleanest and most abundant renewable energy sources. It offers several applications, including generating electricity, providing light or a comfortable interior environment, and heating water for domestic, commercial, or industrial purposes. The Greece solar energy market is segmented by development.

How did the weather affect solar power in Greece in 2022?

The bright weather across the country helped solar PV to contribute to some 13.6% of total Greek electricity production in 2022, breaking yet another record. This outshined the expected 13% share of solar in meeting gross electricity demand.

How much wind power does Greece have in 2023?

As of 2023, Greece plans to have 7 GW of wind power by 2030, according to its National Energy and Climate Plan. More than 4.9 GW of onshore wind energy were in place in Greece as of 2022, providing a sizable amount of the country's electricity needs. Greece has far more wind energy potential, particularly offshore wind.

How much does a solar system cost in Greece?

The average cost of a solar system in Greece is €3 per watt. To account for the typical energy usage of the average home in Greece, most homeowners require a 4.2-kilowatt system. Using the per-watt figure above, a solar installation costs about €8,600, or €6,450 after the federal solar tax credit of 25% is applied.

How much solar capacity will Greece have in 2022?

In 2022, 1.4 GW of new PV projects were connected to the grid, bringing the cumulative capacity to 5.5 GW. This was the best performance ever for the

Greek solar sector. Still, it looks modest if you compare it with the expected performance of the market in 2023 which should bring online around 1.7 GW of solar capacity.

What is the new solar subsidy scheme in Greece?

In March 2023, the Greek government organization for the Environment and Energy announced a new EUR 200 million (USD 215.3 million) subsidy scheme for solar power projects, including ground-mounted solar projects and small-scale energy storage devices for residential and commercial use.
