The new tracks being given a public hearing by Israel's Electricity Authority provide a more rapid return on the investment and address concerns about inflation. As part of its project to install solar panels on 100,000 roofs in Israel, the Ministry of Energy and Infrastructure will initiate two.

Every rooftop can contribute to a sustainable future for Israel. Equip yourself and join the movement toward green energy today! Click here to explore subsidies and take the first step toward a positive change: Find out more now! The Israeli government has launched incentive programs to encourage. Why do Israelis install solar panels on roofs?

This stems from the advantages that the Ministry of Energy sees in installing solar panels on roofs, including energy efficiency (sometimes there is no need to transfer the electricity to high voltage), decentralization of energy production, and meeting Israel's renewable energy goals.

Can solar panels be installed on 100,000 roofs in Israel?

As part of its project to install solar panels on 100,000 roofs in Israel, the Ministry of Energy and Infrastructure will initiate two new incentive tracks to be discussed by the Electricity Authority, for those interested in putting solar panels on their homes.

How much would solar panels cost Israel?

The Ministry of Energy and Infrastructure estimates that if there were solar panels on 100,000 homes, these tracks would result in a net cost of an additional NIS 51 million per year for the Israel Electricity Corp., but in the long term these extra costs should balance out, so the total compensation would not change.

How many residential buildings in Israel have gone solar?

Only a handful of residential buildings in Israel have gone solar due to multiple obstacles, one of which is that a residents' committee cannot secure a bank loan. An apartment building fitted with solar panels (but not storage) in the southern city of Beersheba, through the Sun for All initiative. (Yuval Pan).

Are solar panels a good investment?

Together, they will generate 1.6 gigawatts of installed capacity — a tenth of what's needed to reach the government's goal of generating 30 percent of electricity from renewables by 2030. Energy Minister Eli Cohen told a press conference in Jerusalem that solar panels promised a return on investment of at least 15% annually over 25 years.

What will the government do about solar energy?

The press conference heard that the ministry will launch an extensive public awareness-raising campaign, a new, user-friendly internet site, school programs about the importance of renewable energy, and an increase in solar implementation centers in local authorities to help guide residents through solar installation.
