## Overview

---

Where can I get free shipping on solar battery chargers?

Get free shipping on qualified Solar Battery Chargers products or Buy Online Pick Up in Store today in the Electrical Department.

What are solar battery chargers?

Solar battery chargers are compatible with various battery types, that includes gel cell, AGM, and conventional choices. They come with smart clamp technology that provides polarity protection for the ultimate level of safety. That means the charger only sends power to the clamps when it is properly connected to a battery.

Which solar charger should I buy?

The Jackery SolarSaga 100 is our favorite bigger solar charger. This lightweight panel is more affordable than most similarly sized models and performs as well as the best of them. It's user-friendly and effective in full and partial sunlight. When it's time to pack up camp, simply fold up the legs, then fold it in half and pack it away.

Can a solar panel charge a battery?

These chargers are usually designed to be used more like a portable battery pack and less like a solar panel because the solar panel often isn't big enough to reliably generate a lot of power from the sun. The panel will work in a pinch, but it can be slow to charge the integrated battery.

How many solar chargers are there?

We tested 34 solar chargers to power our adventures, including brands like Jackery, GoalZero, Renogy, and more. A good solar charger lets you power your essential communication and outdoor electronics, no matter how far off the grid you go. Over the last decade, we have tested almost 100 different solar panels of varying sizes.

How do I choose a solar charger?

Direct solar charging speed is one of the most important things to consider when choosing a solar charger. You don't always have ideal blue skies and sunny days when using a solar panel, so we also tested how well a solar panel performs in cloudy conditions.
