

# Solar battery costs

## Overview

---

How much does it cost to install solar batteries?

It costs about \$11,000 to install solar batteries—how much you save depends on where you live. Why trust EnergySage?

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you can make informed home electrification and financial decisions.

How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

Are solar batteries worth it?

Solar batteries typically cost \$10,877 after the federal tax credit—which expires for batteries installed after December 31, 2025—for the 13.5 kilowatt-hours (kWh) of storage a typical home needs to keep essential devices running during outages (also the size of a Tesla Powerwall 3). Whether they're worth it depends entirely on your situation.

Can solar batteries save you money?

Solar batteries can also save you money on utility power long-term. When utility costs are at their peak, you can pivot your home's energy consumption to run off of battery power rather than grid power, leveraging the electricity your solar panels generated when you need it most.

Why are solar batteries so expensive?

There are a handful of factors that influence the price of solar batteries, but perhaps the greatest reason they are expensive is simply because residential-scale batteries are a newer technology, and new technologies tend to be expensive at first before rapidly falling in price as the market matures.

How much does a battery cost on EnergySage?

On EnergySage, Pytes USA Energy offers some of the most affordable batteries at about \$651/kWh. You'll typically pay the most for Enphase batteries, which cost about \$1,510/kWh. \*The average price per kWh of the 10 most quoted batteries on EnergySage in the first half of 2025 (excluding Panasonic, which is closing its solar and storage business).
