

Solar home battery installation new york city ny

Overview

Do I need a solar battery in New York?

No, you don't technically need to install a solar battery in New York. Solar panels can operate and lower your electricity bill even without a battery. However, you may want to invest in a battery to keep your home running in the case of a power outage.

Do solar panels need a battery backup system in New York?

Many solar installations in New York benefit from the addition of battery backup. We design battery backup systems for emergency power and daily use during peak time. We can develop a custom solar battery solution to perfectly integrate with your panels for maximum efficiency and cost savings.

Why should you install solar panels in New York?

High taxes and heavy traffic aren't the only problems that New York residents deal with. Frequent power outages, the highest electricity rates in the nation, and unhelpful utility companies are a fact of life here. At least, they were before solar became so affordable. Solar panel installation in New York will give you true energy independence.

Is NY State solar a good solar installer?

Due to our experience, NY State Solar has been designated by NYSERDA as a Gold Quality Installer, making us one of the top 4% of solar installers for quality, based on their detailed inspections of all solar installations statewide! NY State Solar is proud to be an authorized, quality NYSERDA contractor.

What is commercial solar in New York?

Commercial solar in New York is developed to closely meet your business needs today and provide flexibility for the future. We develop commercial solutions for applications ranging from retail and office space to agriculture and manufacturing.

How does New York state solar work?

With New York State's ambitious climate goals to lessen reliance on fossil fuels, NY State Solar works to collectively increase residential solar adoption in your community.
