## Overview

---

When will energy storage systems be operational in Chile?

He said that the goal is to tender these storage systems by 2024 and have them operational by the end of 2026. The planned energy storage projects will be located in various sites in northern Chile, where most solar and renewable energy power plants are situated, requiring a total investment of \$2 billion.

Does Codelco have a PPA for a solar-plus-storage project in Chile?

This is not the first time Codelco and Atlas Renewable Energy have signed a PPA for a solar-plus-storage project in Chile, following the two companies' signing of a 15-year 375GWh 24/7 supply agreement in March 2024. At the time, this marked the developer's entrance into the BESS market, according to its CEO.

Why are solar PV projects being co-located in Chile?

More and more solar PV projects are co-located or hybridised with BESS in Chile as solar PV as standalone projects have become financially unviable in the country. One of the challenges Chile faces is the ever-increasing curtailment of solar PV and wind.

Is Chile preparing a tender mechanism for large-scale energy storage facilities?

The president of Chile, Gabriel Boric, has said that the government is now preparing a bill to establish a tender mechanism for large-scale energy storage facilities. The measure aims to maximize the use of renewable energy generated in the northern part of the country.
