

# **Solar plus storage supplier quotation in India 2025**

## Overview

---

The storage costs reflected by the latest auction prices in India have profound implications for the costs of a flat block of power - i.e., a solar+storage system can supply a steady stream of power with high availability throughout the year, given the cost-competitiveness of current solar prices.

The storage costs reflected by the latest auction prices in India have profound implications for the costs of a flat block of power - i.e., a solar+storage system can supply a steady stream of power with high availability throughout the year, given the cost-competitiveness of current solar prices.

ation. Recent energy storage auctions in India reveal record-low prices, with unsubsidized standalone battery storage bids at 2.8 lacs/MW/month and solar+storage bids at 3.1–3.5 I R/kWh. Our analysis, based on implied solar and storage costs from these bids and bottom-up global cost estimates.

India's solar + storage market is set to hit \$10B annually. A virtual roundtable by ETEnergyworld & Bharathi Solar will explore tech, policy, market trends shaping this growth as India targets 500 GW renewable energy by 2030. India is expected to see a significant rise in the adoption of solar +.

Utility-scale ground-mounted projects have been driven India's installations, and market demand will likely rise further in 2024 and 2025 under government-led tenders. Meanwhile, India's energy storage demand is also picking up. According to the NEP 2023, India's storage demand is projected to.

India's National Thermal Power Corporation (NTPC) has launched a tender for 1,200MW of solar PV with 600MW/2,400MWh of energy storage systems (ESS). The state-owned public power company, one of the country's largest generation entities, opened an invitation for bids (IFB) earlier this week (27.

State-owned firm Solar Energy Corporation of India (SECI) has launched a solar-plus-storage tender seeking 1.2GW of solar PV. SECI issued a request for selection (RfS) last week (19 June) for the competitive solicitation process and aims to hybridise the solar PV generation with 600MW/3.6GWh of.

With solar plus battery storage systems emerging as the go-to solution for consistent, green, and economically viable power, the energy landscape is being reshaped. From industrial clusters to corporate campuses, the appetite for storage-backed solar installations is growing rapidly. India is. Will India become a leader in integrating solar power with energy storage?

According to industry reports, India is set to become one of the leading countries in integrating solar power with energy storage, as the country aims to achieve 500 GW of renewable energy capacity by 2030.

What is the future of solar battery storage in India?

The solar battery storage market in India is expected to develop rapidly by 2025 due to lowering prices, strong government backing, and rising energy security demands. As the country moves toward its ambitious goal of 500 GW of green energy by 2030, the market is expected to hit \$10 billion annually.

Is 2025 a good year to buy solar panels in India?

As the country moves toward its ambitious goal of 500 GW of green energy by 2030, the market is expected to hit \$10 billion annually. Because of this rise, 2025 is the best year for Indian homes to buy solar systems with storage.

How has the solar-plus-Bess market changed in India in 2024?

In 2024, the scenario changed significantly for the solar-plus-BESS segment in India. In March 2024, SECI shared the first large-scale build-own-operate (BOO) tender for 1.2 GW of solar PV with 0.6 GW/1.2 GWh of BESS capacity. The tender was very well received by the industry and saw the lowest tariff discovery of Rs 3.41 per kWh.

Did NTPC win a solar-plus-storage tender?

The power generation company launched a tender for the same capacity of solar and ESS in June last year. NTPC subsidiary NTPC Renewable Energy Limited was a recent winner in a solar-plus-storage tender hosted by Solar Energy Corporation of India (SECI), as reported by Energy-Storage.news earlier this month.

When will solar-plus-storage & solar-wind hybrid tenders open in India?

A pre-bid meeting for the tender takes place on 10 July 2025, and bidding will open on 21 August. Solar-plus-storage and solar-wind hybrid tenders have

been on the rise in India last year. Nearly half of the 73GW capacity tendered in 2024 is coming from hybrid tenders.
