

Solar storage inverter tender price in Romania 2025

Overview

How much does solar cost in Romania?

Romania has opened its second renewables auction under a contracts-for-difference (CfD) scheme, offering 3.47 GW of capacity, including 1.47 GW of solar. The auction sets a maximum strike price of €73 (\$81.81)/MWh for solar energy. Romania's Ministry of Energy has announced its second renewables auction under a CfD scheme.

Will Romania launch more CFD tenders in 2025?

Romania now plans to launch more CfD tenders for 3.5 GW of solar and wind energy capacity in 2025. The minister also promised a new scheme for storage facilities.

How much solar capacity does Romania have in 2023?

According to the latest market data, the Romanian solar PV market added more than 1 GW of newly installed capacity and scored a remarkable 308 % increase compared to the previous year's growth. Thus, Romania reached a cumulative solar capacity of 2.9 GW at the end of 2023. Romania Solar Resource Potential.

Does Romania have a good solar resource potential?

Romania has very good solar resource potential as the geographical location is favourable for utilising solar energy. Romania is located in an area with a solar potential of 210 sunny days per year and with an annual solar energy flux between 1,000 kWh/m²/year and 1,300 kWh/m²/year.

Will NRRP support Romania's battery and solar photovoltaic manufacturing sectors?

The Ministry of Energy has recently announced a call for proposals to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, worth €199 million and funded through the NRRP.

Solar storage inverter tender price in Romania 2025

The second CfD auction for renewables is entering a straight line.

Romania is organizing this year the second auction of renewable projects that would benefit from the Contracts for Difference (CfD) mechanism. The ministerial order was ...
