

# South africa s first battery energy storage

## Overview

---

The Hex BESS is the first project to be completed under Eskom's flagship BESS project announced in July 2022 to help alleviate the pressure on the national electricity grid.

The Hex BESS is the first project to be completed under Eskom's flagship BESS project announced in July 2022 to help alleviate the pressure on the national electricity grid.

Friday, 10 November 2023: Eskom unveiled the first of its kind largest Battery Energy Storage System (BESS) project not only in South Africa but in the African continent. Eskom officially opened the Hex BESS site at Worcester in the Western Cape yesterday. The Hex BESS is the first project to be.

Envision is the first energy storage system supplier in the region to secure a GWh-scale order. The initiative will significantly enhance South Africa's power infrastructure, alleviating grid congestion and increasing renewable energy integration. Credit: The Desert Photo/Shutterstock. Envision.

The three Oasis 1 battery energy storage systems (BESS) projects, led by EDF group in collaboration with Mulilo, Pele Green Energy and Gibb Crede, reached financial close, on 15 and 19 November 2024. Awarded in the first round of South Africa's Battery Energy Storage Independent Power Producer.

Minister of Electricity and Energy Dr Kgosientsho Ramokgopa announced the successful signing of project agreements and the commercial close of an additional two projects appointed as preferred bidders under the first Battery Energy Storage Independent Power Producer Procurement Programme (BESIPPPP).

Utility-scale battery storage could be one pillar to provide additional grid stability by helping to meet peak demand, help integrate variable renewables, and, especially for industrial consumers, provide continuous electricity during load shedding and outages. South Africa is aiming to procure.
