

# Sse energy storage investment

## Overview

---

SSE welcomes today's announcement by the UK Government confirming its decision to finalise and implement a cap and floor investment framework to support the deployment of long-duration electricity storage projects, such as pumped storage hydro.

SSE welcomes today's announcement by the UK Government confirming its decision to finalise and implement a cap and floor investment framework to support the deployment of long-duration electricity storage projects, such as pumped storage hydro.

- New cap and floor scheme can unlock investment in critical nation building projects including what will be the UK's largest natural battery, SSE's 1.3GW Coire Glas pumped storage hydro scheme - SSE welcomes today's announcement by the UK Government confirming its decision to finalise and.

Our strategy is to create value for shareholders and society in a sustainable way by developing, building, operating and investing in the electricity infrastructure and businesses needed in the transition to net zero. From onshore wind, offshore wind and hydroelectric to solar and battery storage.

SSE's first battery energy storage system (BESS) project at Salisbury in Wiltshire, England is now fully operational. The 50MW / 100MWh BESS project, which could power over 80,000 homes\* for two hours at times of peak demand, is the first operational battery site in SSE's portfolio. The asset is.  
What is SSE Renewables doing in the UK?

SSE Renewables is progressing a development pipeline of pumped storage hydro projects in the UK. In addition to Coire Glas, SSE has plans to convert the largest conventional hydro power station in its existing hydro power fleet, the 152.5MW Sloy Power Station in southern Scotland, into a pumped storage hydro scheme.

What is SSE Business Energy?

SSE Business Energy in Great Britain and SSE Airtricity on the island of Ireland

provide a shopfront and route to market for SSE's generation, renewable green products and low-carbon energy solutions. We aim to be a leading energy company in a net zero world.

What is SSE Renewables & SSE thermal?

SSE Renewables is driving the net zero transition through the development, financing, construction and operation of world-class renewables. SSE Thermal is providing critical flexibility to offset renewables variability as the energy system transitions to net zero.

Does SSE have a cap and floor Investment Framework?

SSE welcomes today's announcement by the UK Government confirming its decision to finalise and implement a cap and floor investment framework to support the deployment of long-duration electricity storage projects, such as pumped storage hydro.

How does SSE operate its assets?

SSE operates its assets in a responsive and responsible way. It promotes a culture of continuous improvement and stakeholder engagement to provide quality customer service. SSE invests in low-carbon infrastructure as part of its net zero-focused strategy.

Who is SSE Renewables?

From onshore wind, offshore wind and hydroelectric to solar and battery storage, SSE Renewables is a world class developer and operator of renewable energy in the UK and Ireland with a growing presence internationally.
