

# **Successful bid price of NMC battery storage project in China 2026**

## Overview

---

According to local news reports, the tender attracted 76 bidders with quoted prices ranging from US\$60-82 per kWh, averaging US\$66.3 per kWh. Based on the 16GWh quantity, that implies a total contract value of roughly US\$1 billion.

According to local news reports, the tender attracted 76 bidders with quoted prices ranging from US\$60-82 per kWh, averaging US\$66.3 per kWh. Based on the 16GWh quantity, that implies a total contract value of roughly US\$1 billion.

The procurement exercise has attracted 67 battery energy storage companies but only six have emerged as winners. The average bid stood at CNY 0.473/Wh (\$65/kWh). Public procurements in China continue to demonstrate exceptionally low price levels for lithium-ion phosphate (LFP) battery energy.

it in rechargeable batteries for use at a later date. When energy is needed, it is released from the BESS to power demand to lessen any the integration of demand- and supply-side management. An augmented focus on energy storage development will substantially lower the curtailment rate of renewable.

State-owned EPC firm China Power Construction Group (Power China) recently concluded a 16GWh BESS supply tender, which resulted in extremely low prices amidst a squeezing of market share and increased buying power from state-owned companies, an S&P analyst told Energy-Storage.news. The tender for.

This report analyses the winning bid price trends of energy storage systems and turnkey EPCs in China's utility-scale and C&I energy storage market in H2 2024. It is based on the prices from all the publicly announced winning bids from January 2023 to December 2024 by different districts, project.

Taking Lithium Iron Phosphate (LFP) systems (0.5C) as an example, the annual average winning bid price was ¥0.7054 / Wh, with a weighted average price of ¥0.7093 / Wh in December. Winning bid prices for Energy Storage EPC saw a

slight decline. For LFP projects with a 2-hour duration, the annual.

The average winning bid price for 2-hour lithium iron phosphate (LFP) energy storage systems in 2024 was 86 \$/kWh, down 43% compared to the average price in 2023. A number of factors played a part in low price cells beyond the usual cutthroat competition. China has become increasingly competitive.

## Successful bid price of NMC battery storage project in China 2026
