

# **Successful bid price of commercial energy storage project in Canada 2026**

## Overview

---

The ELT1 resulted in a total of 739 MW of utility-scale storage being procured, with in-service dates in 2026. [4] The weighted average price for successful proponents was approximately CAD836/MW. The ELT1 also included a non-storage category for natural gas-fired power stations.

The ELT1 resulted in a total of 739 MW of utility-scale storage being procured, with in-service dates in 2026. [4] The weighted average price for successful proponents was approximately CAD836/MW. The ELT1 also included a non-storage category for natural gas-fired power stations.

The IESO issued the largest storage-based procurement in Canada in February 2023 with the Expedited Long-Term 1 RFP (the ELT1). The ELT1 resulted in a total of 739 MW of utility-scale storage being procured, with in-service dates in 2026. [4] The weighted average price for successful proponents.

The LT1 RFP procurement for electricity capacity has now concluded. The procurement has resulted in competitive prices for new resources, municipal support, and significant Indigenous participation and equity ownership in projects. The IESO has executed contracts with 13 selected proponents.

The installed capacity of energy storage larger than 1 MW—and connected to the grid—in Canada may increase from 552 MW at the end of 2024 to 1,149 MW in 2030, based solely on 12 projects currently under construction 1. There are an additional 27 projects with regulatory approval proposed to come.

CanREA congratulates seven member companies for their success in the IESO's LT1 procurement for energy storage in Ontario. Toronto, May 9, 2024—The Canadian Renewable Energy Association (CanREA) wishes to congratulate seven member companies who have been selected by Ontario's Independent.

The first contract awards for Ontario for the province's expedited LT-1 energy capacity procurement have been announced, in which 739MW of battery storage bids were successful. Back in October last year, the government of Canada's most populated province ordered the procurement of between 1,500MW.

Ontario's Independent Electricity System Operator (IESO) has contracted out a 390-megawatt battery energy storage system (BESS), which it says is Canada's biggest to date. The deal is one of 10 recently announced projects that will provide a total of 1,784 megawatts of energy storage. The IESO has. What is the largest storage-based procurement in Canada?

The IESO issued the largest storage-based procurement in Canada in February 2023 with the Expedited Long-Term 1 RFP (the ELT1). The ELT1 resulted in a total of 739 MW of utility-scale storage being procured, with in-service dates in 2026. The weighted average price for successful proponents was approximately CAD836/MW.

What is the largest energy procurement in Canadian history?

The almost 1,800 megawatts of BESS projects make up an energy procurement round from IESO that totals 2,195 megawatts of capacity, including 411 megawatts of natural gas and on-farm biogas generation. The Ontario government claims the deals make up the largest battery storage procurement in Canadian history.

What is the fastest growing energy storage technology in Canada?

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed to be commissioned by 2030 are battery storage, with two CAES and two PHS projects also proposed.

What is the largest battery storage procurement in Canada?

The Ontario government claims the deals make up the largest battery storage procurement in Canadian history. The Skyview 2 project is planned to be situated south of Ottawa, made up of approximately 400 containers, each about the size of a 20-foot shipping container. It will occupy less than 30 acres of rural land.

What is Canada's biggest battery energy storage system?

A battery energy storage system similar to the one that will be in place at the Grey Owl Storage project. (Courtesy Neoen) Ontario's Independent Electricity System Operator (IESO) has contracted out a 390-megawatt battery energy storage system (BESS), which it says is Canada's biggest to date.

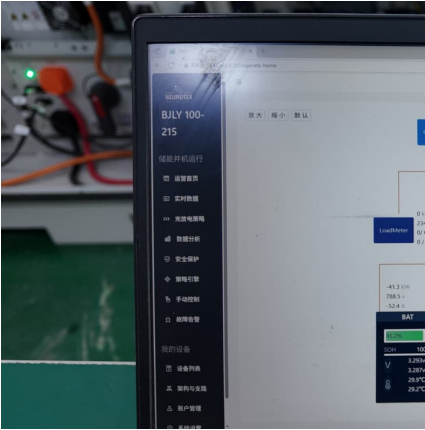

How many energy storage projects are there in Alberta?

While there are nearly 50 energy storage projects currently listed within the Alberta Electric System Operator (AESO)'s projects list, the development of a 600MW portfolio of five solar-plus-storage projects by Westbridge Renewable Energy Corp. is underway.

## Successful bid price of commercial energy storage project in Canada

### [Ontario Completes Largest Battery Storage ...](#)

TORONTO - The Ontario government has concluded the largest battery storage procurement in Canada's history and secured the necessary electricity generation to support the province's growing population and ...
