

# **Successful bid price of container energy storage project in Greece 2026**

## Overview

---

How many projects have been awarded in Greece's first battery energy storage system?

The Greek Regulatory Authority for Energy has confirmed that 411.8 MW of projects have been awarded in the country's first standalone battery energy storage system (BESS) tender, which has attracted huge interest among developers. Investment and operating aid will be granted to 12 projects put forward by seven proponents.

How many MW of new battery storage capacity does Greece have?

The Greek authorities have awarded 300 MW of new battery storage capacity in its second energy storage tender. The 11 winning projects range in size from 8.875 MW/17.75 MWh to 49.9 MW/100 MWh.

Does Greece have a battery storage pipeline?

Greece has emerged as one of the countries with the largest pipeline of battery storage projects, but as yet there has been little activity on the ground. This is changing as the long-awaited storage subsidy auctions have started, with the first projects being awarded support for both investment and operating costs.

Why is Greece launching a storage auction in 2021?

Funding was first announced in 2021 as part of the National Recovery and Resilience Plan. Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules.

How many battery storage projects are being auctioned this year?

The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license. With support for 1GW of battery capacity to be auctioned 3 tranches this year, the results for the first

auction of 400MW have been announced with a few winners, but lots of losers.

Which energy projects remained below the line?

Two offers remained below the line: Alasia's two projects of 36 MW each and R1 Energy's planned unit of 50 MW. CNI's bid for a facility in Livadia was the lowest: EUR 44,100 per MW per year. The highest, at EUR 49,917 per MW per year, was for Terna's battery array in Thebes. The average was EUR 47,680 per MW per year.

## Successful bid price of container energy storage project in Greece 2
