

# **Successful bid price of hybrid renewable storage project in Saudi Arabia 2030**

## Overview

---

Saudi Electricity Company (SEC) has secured two massive battery energy storage systems totaling 4.9 GWh at a cost of just USD 73-75 per kilowatt-hour (kWh) installed, marking a potential turning point for energy storage economics outside China. What does BYD energy storage mean for Saudi Arabia?

BYD Energy Storage and Saudi Electricity Company (SEC) have signed a contract to deliver the world's largest grid-scale energy storage project totalling 12.5GWh. This milestone supports Saudi Arabia's Vision 2030, which targets 50% renewable energy in the national mix by the end of the decade.

How will Bess projects impact Saudi Arabia?

The successful implementation of BESS projects will significantly contribute to Saudi Arabia's goal of increasing the share of renewable energy in its power mix, targeting 50% by 2030.

When is the bid submission date for a Special Purpose Vehicle (SPV) project?

At present, SPPC sets the bid submission date as 02 June 2025. Each project will be developed under a build-own-operate (BOO) model, with the successful bidder holding 100 per cent equity in the special purpose vehicle (SPV) set up to develop and operate the Independent Storage Provider (ISP) project.

## Successful bid price of hybrid renewable storage project in Saudi Arabia

### SMM Analysis? Saudi Arabia Begins Prequalification for 8 ...

This initiative is part of Saudi Arabia's energy transition plan, aiming to achieve 48GWh of energy storage capacity by 2030 to support its goal of having 50% renewable ...
