

Successful bid price of residential ESS project in France 2025

Overview

How much money could a 2-hour Bess make in France?

Discover how a 2-hour BESS in France could have earned €1.4 million annually under April 2025 price conditions. Learn what drove the price spike.

Why has the supply of residential Bess increased in 2024?

At the same time, the supply of residential BESS has increased because of the appearance of Asian players on the large and comparatively attractive European market; our research shows that European residential BESS installation represents 71 percent of global installations in 2024.

How can European residential Bess OEMs capture additional revenue?

European residential BESS OEMs can capture additional revenue by first ensuring that manufactured BESS products meet the criteria of sales professionals and installers and then by focusing on building trusting relationships.

How much does Bess cost in Europe?

In early 2024, the price of residential BESS offered to end consumers in Europe ranged widely, from €400 to more than €1,200 per kilowatt-hour (kWh) (Exhibit 2). Historically, European OEMs built trust-based brands by highlighting their “made in Europe” status and rode the first-mover wave over the past ten years.

How are European Bess OEMs putting cost pressure on Europe?

These international players are placing cost pressure on European BESS OEMs by driving down prices. In early 2024, the price of residential BESS offered to end consumers in Europe ranged widely, from €400 to more than €1,200 per kilowatt-hour (kWh) (Exhibit 2).

How much do energy alternatives cost in Europe?

Furthermore, rising interest rates and the general decline of the European economy mean consumers are more conservative when it comes to making investments in energy alternatives, such as solar photovoltaic (PV) and BESS, which can easily cost up to €30,000.
