

Turnkey rooftop solar battery EPC contract price in New Zealand

Overview

Are solar EPC contracts common in New Zealand?

However, EPC contracts are not common in the domestic construction industry - there is no market 'standard' form in New Zealand. Consequently, in New Zealand the solar EPC contracts are either based on the FIDIC suite, or bespoke agreements used by private developers in other jurisdictions.

Where is solar EPC based?

Headquartered in Auckland, we operate across New Zealand. Latest news and insights. With 13 years of international experience in the solar industry, we are quickly becoming the leading solar EPC company in New Zealand.

Will New Zealand's energy competition Taskforce changes lead to more solar power?

RNZ's Susan Edmunds reports on the Energy Competition Taskforce proposals and says the changes "should lead to New Zealanders with solar power systems on their houses get more of a return for any power they put back into the system".

Will EPC contracts provide for the handover of a solar facility?

EPC Contracts will not provide for the handover of the solar facility to the Project Company, and the PPA will not become effective until all commissioning and reliability trialling has been successfully completed.

How does a roof top solar PV system work?

In the case of a roof top or ground mount solar PV system, the energy captured by the panels during daylight hours can be stored by the battery which can then be used to power your business during peak high tariff times, when energy purchased from the grid is at a premium, or at night.

Should you choose an EPC contract for a solar project?

Given the significant monetary value of EPC Contracts, and the potential adverse consequences if problems occur during construction, the lowest price should not be the only factor used when selecting a Contractor. As noted earlier, an EPC Contract is one of a suite of agreements necessary to develop a solar project.
